HOW NOT TO LIGHT A BRIDGE TABLE

Think of trying to play bridge by the light of two candles, stuck in bottle tops. Yet that is the equivalent of the light in many homes — a level of illumination that will make any party drag.

For gayer, livelier parties, use an indirect portable lamp. It provides the ideal light shadowless and glareless — for playing bridge and other games in comfort . . . and an equally efficient light for a quiet evening of reading.

Phone Southern Public Utilities Co. and ask for a free demonstration of the new type direct-indirect lamp in your home.
