SOCIALISTS RAP BILBO AND TALMADGE

BROOKLYN — In a wire to President Truman today, James F. Cannon, National Secretary of the Socialist Workers Party, demanded that the Federal Government take immediate steps to prosecute Bilbo, Talmadge, Rankin, Eastland and all other fomenters of race violence in high office. The telegram stated:

"The Federal Government must ferret out and prosecute to the full extent of the law the lynchers of the four Negroes in Georgia and end the reign of terror against the Negro people.

"The Federal Government must prosecute Bilbo, Talmadge, Rankin, Eastland and the other officials, all prominent members of your political party, who have instigated these lynchings from high office.

"We further demand that you hold Congress in session until it enacts effective anti-lynching legislation.

"Your Administration will go down in history as the accomplice of the Ku Klux Klan and other fascist terror unless you put an end to the government's policy of whitewash investigations and backpassing. The American people are in no mood to countenance a reign of terror that rivals the practices of the Nazi storm-troopers."

Airman Praised For 'Out Of World' Story

NEW YORK (ANP) — Commendation from aviation specialists throughout America and abroad has been received here recently by Harper's magazine for the article, "Out Of This World," written by James L. H. Peck published in the June issue.

Peck, a flyer, free-lance writer on scientific subjects and former aviation editor of the Associated Negro Press, wrote on the ionosphere which he describes as a new realm of electrified layers enveloping the earth, discovery of which is as revolutionary as the atomic bomb.

Recently discharged from the merchant marine, Peck has returned here to do research on aviation subjects. He is the author of "578 Miles an Hour, Vertically," and "Bomber to Britain," both of which also appeared in Harpers magazine.

JOHNNIE'S desire to tinker with doorbells, radios, electric irons—may be the first expression of an inborn talent. A capacity for earning that should be encouraged.
Much progress has been made in integration of Negro workers in crafts and trades, and today there are more than 3,300 electricians. High wages and protective security more than compensate for time spent studying new techniques and obtaining professional efficiency.
Every year, thousands of potentially successful men and women are forced to quit school because an unexpected emergency may necessitate their supplementing the income of a widowed mother. Accumulated savings, intended for education and training, are quickly wiped out . . . and another bright boy or girl must turn to the low pay "traditional" jobs.
Tragic? Yes, but it can be prevented by insuring the future now. Your N. C. Mutual underwriter will gladly show you how.
