CHARLES M. JOHNSON

Whose Qualifications In State Government Make Him The Best Fitted Man To Be The Next

GOVERNOR of NORTH CAROLINA

1. Salaries: "First of all, I wish to see the State pay salaries that will attract and hold in the State's service the most competent and consecrated teachers. To accomplish this, there must be a substantial increase in teachers' salaries".

2. More Teachers: "We must lighten the teacher's pupil load . . . A reduction in the pupil load can be accomplished only through the employment of more teachers. This will cost money but it will be money well spent".

3. State School Building Aid: "Some of the surplus now on hand in the State treasury should be used in aiding less fortunate communities, particularly rural areas, to provide adequate school buildings".

4. School Health: "We should have in North Carolina a school health program that will insure to every child in every section, however disadvantaged, a fair chance of a healthy start in life".

5. Additional Progress: "A State School Commission, composed of intelligent and public-spirited citizens, is now making a thorough survey of our state school system, of our educational needs and of our ability to meet them. Its recommendations will have my sympathetic consideration".
