The announcement is made of the marriage of Miss [illegible] to Oscar F. Durham on Wednesday, June 15, at High Point, N. C.

Benton were the only other guests. Immediately after the ceremony Mr. and Mrs. Durham left for their bridal tour which will cover many northern points of interest and a month's stay at Flora, Illinois, the bridegroom's home.

The bride is the daughter of Rev. J. A. Cook of High Point and widow of the late Eugene Moorhead Armfield. She is a strikingly handsome young woman and has many friends who have known her from childhood.

The bridegroom, though a native of Illinois, has for several years made High Point his headquarters and is well and favorably known.

Many summer tones were placed in the halls and rooms where the club members received the guests and where the musical program was given and from some of rare hue was followed in the refreshments served later in the evening. The program was conspicuous alike for the quality of high tone music rendered than for its length. Miss Reid was accompanist and the vocal solos by Misses Edith Moore, James Barress, Mesdames Richardson and Hazel Hammond and instrumental numbers by Mr. [illegible] Hazelell and Mr. Boyd and the song in German by Miss Lucy Fetter were the chief pieces.

Twenty Pound Sheepshead Caught

Special to Daily News.

Wanchese, June 25. Thursday W. I. Kennedy made a most unusual catch of sheepshead. He has always had great luck as a fisherman, not only by bringing in large numbers but very big fish. This catch was remarkable because of the size of the fish. Each sheepshead averaged about 18 pounds. These are among the largest sheepshead ever caught.

John E. Wells and party brought in one of the season's largest mackerel catches. The mackerel fishing is at its best now and many parties are down.

Catches of blue fish and trout are heavy daily.

The final clambake of the season was given Thursday evening by J. Bashe of Lynchburg. The long tables gathered around a large bonfire built close to the water's edge and on Manteo's most expert of cooks, and large of the baking of the mental baskets of clams.

MEBANE'S GREAT DAY

Fourth of July to Be Celebrated in Royal Style.

Special to Daily News.

Mebane, June 25. The Fourth of July will be a grand day in Mebane.

The Independent under the management of F. M. Graves and the cornet band will be on a very large scale. [illegible] will be [illegible] The dance will be in the tobacco warehouse which will furnish plenty of room for 300 couples or more. Mr. Graves as Knight of India, will deliver the goods in great shape. The music will be at the best.

Mebane lodge No. 40, I. O. O. F. will have a novel installation of officers by Hon. W. H. Iverson of Durham and Hon. C. F. McMichael, of Wentworth. Other lodges will be on hand to aid in the good work. Hon. C. F. McMichael will deliver the Fourth of July oration, and is more a speech of very fine order, as Mr. McMichael is one of the finest speakers in North Carolina.

The baseball game between Cedar Grove and Mebane teams will be a big affair. Good and will be a very hot game, as these teams [illegible] a week ago a 12 inning game score 3 to 3. The game was called on account of dark.

Orchids show and many other [illegible] are [illegible] to be on hand to be [illegible] show, insures a rare and refreshing treat.

SCOTLAND NECK

Scotland Neck, June 25. The J. D. Stewart factory has been shut down a day or two in order to place the machinery on everything machine. Since beginning operations about two weeks ago the plant has been run regularly and supplying to the town and community. Mr. Stewart says with this machine the cotton is like crystal and will be of a pure quality.

There has been arranged a double header ball game to be played here on the fourth of July between the Aulander team and Scotland Neck. The two teams [illegible] games. Aulander has won the first game there [illegible] ago.

Another game will be played on July 4 between Scotland Neck and the girl team known as the girl blooper team, who are touring the south playing ball.

We heard one of our best farmers say a day or two ago that the hot sun for the past several days in June much resembled burning out the crops that were thought to be considerably damaged by the recent heavy rains. He also said that the prospects were very bright at this season now.

There was a small fire at Whites mill yesterday, probably 30 or 40 people being present. It was somewhat of a family affair, being given by Mrs. J. W. Grant. All present had an excellent time at the mill, which is a favorite place for this purpose. Other parties are arranging similar outings for the near future.

July Hampton's.

July Hamptonia represents the acme of light summer reading, sound quality, and first class material. In this issue Commander Peary details his day by day marches across the polar ice and gives a vivid description of how he finally passed his own "artifical north." The story ends with the camping at 87 degrees 47 minutes north. In the next installment Commander Peary will tell of the journey to the North Pole. In the present July issue he gives additional "points" which were recently refused by Congress.

The second act of Chanteclerc opens the promise of the brilliant first act, and is one of the most widely read magazine features of today. People all over the country are talking about Rostand's masterpiece, the exclusive publication of which is to be found in Hampton's during the summer months.

Charles Edward Russell continues his onslaught against the Southern Pacific railway, and in this number tells of the brutal murder of settlers at Mussel Slough. Facts in this notorious crime have never been so fully explained as Mr. Russell explains them.

Ellen Chase Dyer has another remarkable article on remaking the health of our school children. This week is full of a potent heart interest, and is bound to appeal strongly to parents and school teachers throughout the United States.

Speed Kings" by Edward L. Fox is a snappy, brilliant dashing write up of the great automobile drivers of the country and their terrible risks of life to cut down the records. Nobody can read the article without feeling the intoxicating sensation of speed.

In Action Hampton's stands preeminent among the July list. Arthur Stringer begins in "The Secret Code" a sensational new series which surpasses in the opinion "The Wire Tappers." He delivers the marvelous mechanic adventures in an inimitable he falls into plot after plot in which he extricates him and with amazing audacity.

"The Watch Dog" by P. H. Wesselhoeft is a bright humorous summer story about a man a girl an Eng[illegible] and a building.

"A Wife and His Work" by Forest Halgan is one of the best short stories that has come to our notice. It deals with the fundamental facts of married life in a simple and helpful manner.

Excess Baggage" by Rose Carson is a rattling good base ball story which [illegible] will appreciate. It is said to be [illegible]

Strange Marriage Concession" by [illegible] is [illegible] the entrance of a [illegible] the last of the [illegible] an American girl married to an Italian count.

There are poems by Richard Wright, Mary C. Lockom Fernandez. An excellent department of personalities gives us admirable sketches of David Lubin, who organized the International Institute of agriculture to stop gambling in wheat. Miss Gertrude Foster, the first woman county treasurer in the United States. A. Leo Weil, the lawyer most directly responsible for Pittsburgs graft expose. Ernest P. Bicknell, the man who organized the "Big Brother" movement, and Dr. William H. Welch, president of the American Medical association.

The Value of Pageants.

The Century's sympathy with the movement for a saner method of celebrating the Fourth of July is shown in two articles of the July issue. Percy MacKaye, in writing of "The New Fourth of July" offers suggestions for the patriotic pageants, and Ellis Paxson Oberholtzer, director of the Historical pageant in Philadelphia in 1908, gives an account of recent "Historical Pageants in England and America." Mr. Oberholtzer makes a plea for pageants on the ground of their distinct educational value and their awakening of neighborhood pride and spirit.

All in Due Time.

(Buffalo News.)

The Democrats are entering the elections now, while the Republicans are legislating in the welfare of the people. In November the Republicans will have time to carry the elections, too.

Miss Jessie Norse left yesterday afternoon for Durham where she will visit several days with relatives.

An Endless Chain of Sickness.

There are upwards of one million deaths each year in the United States. In 90% of cases the people who die are less than sixty five years old. The evils that are due to disease can be escaped just in proportion as the conditions and habits that bring on disease become more widely understood.

Then too a chronic disease which may baffle the skill of the general practitioner may yet be permanently cured by the Physician who has made one line of disease a specialty.

It would be just as absurd for the Professor in a medical college presuming to lecture on all subjects as for the one Physician to presume to understand the nature and cure of every disease.

That is why Dr. R. V. Pierce established the Invalids' Hotel and Surgical Institute many years ago, with a full staff of Physicians and Surgeons—who though educated to practice in all departments of medicine are here assigned to a special department only, to which each specialist devotes his entire time, study and attention.

The sick who have been treated at Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., have much to say in regard to this wonderfully equipped Sanitarium, where all electrical apparatus, as well as electric water baths, Turkish baths, static electric machines, high-frequency current, and other most modern and up-to-date apparatus are used for the cure of chronic diseases. The treatment of chronic diseases that are peculiar to women have for many years been a factor in the cures effected at the Invalids' Hotel and Surgical Institute.

The physicians and surgeons employed are among the most experienced and skillful in the country, men who have made these diseases their life study, and whose highest ambition is to excel in their treatment.

How well they have succeeded may be judged from the fact that their practice embraces patrons from every State and Territory of the Union as well as from foreign lands. Many thousands are annually treated, either through correspondence or at Dr. Pierce's Institution. It is an old adage that, "Experience makes perfect," and the skilled specialists in this field of practice cure thousands of cases which have been abandoned as incurable by general practitioners.

One of the most wonderful electrical appliances is the X-ray used at the Institute which has been used both in the treatment of various diseases and in the diagnosis of many concurrent conditions. Within its aid the interior of the human body is no longer the sealed book it has been heretofore. Abnormal states of the bones, gall stones, stone in the bladder or in the kidneys, are shown plainly by what are known as X-ray photographs. Internal tumors, and the enlargement of the deep-seated organs, are also discovered by this means and in the diagnosis of tuberculosis of the lungs this agent has proven a most valuable aid. When applied to some of the less fatal chronic ailments of germ origin it has proven very effective as a curative agent.

Another interesting proceeding is the violet ray treatment produced by concentrating the violet or chemical rays from an arc light with a specially prepared carbon upon any portion of the body that may be the seat of pain. Sufferers from neuralgia, sciatica, rheumatism, strains, sprains, also from those obscure exhausting pains the origin of which cannot at times be accurately determined, frequently find immediate relief from a single treatment and usually with a little persistence, [illegible] health or perfect recovery is obtained.

The incandescent light bath, consisting of a cabinet in which the patient is bathed in the combined rays of many electric light globes, has produced really wonderful results in diabetes, eczema, rheumatism, obesity, anæmia, and some forms of kidney and heart trouble. It has also proven valuable in chronic bronchitis, bronchial asthma and various skin diseases. As a general hygienic measure its efficiency can scarcely be overestimated.

Hundreds are brought to this Institution from far distant states and they go home in a few weeks well and strong. Quite as marvelous are the thousands of cures annually accomplished through correspondence, while the patient remains quietly at home. Others consult in person, and after being examined are provided with especially prepared medicines and return home to carry out the treatment.

Everyone who consults the specialists, whether by letter or in person receives the most careful and considerate attention.

Great care is exercised not to over encourage those who consult the specialists of this institution that no false hopes may be raised.

Consultation by letter or in person is absolutely free—no charge whatever—so that the public when afflicted are invited to write Dr. Pierce at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y.
