HINTS TO PERSONS IN THE COUNTRY.—For Pianos to be durable and last for fifty years, (as they ought to do,) they should be made of timber that has been seasoning for years upon years in surroundings, otherwise, sooner or later, they are obliged to give way and become worthless. To carry out this important feature, as well as a great many other things connected with the proper manufacture of Pianos, large amounts of money and experience are required, and but few makers have enough of both. With this state of things staring us in the face, is it prudent or safe to purchase from some portable traveling agents, who are here to-day and gone to-morrow, simply, perhaps, because the Piano possesses a handsome outside appearance and is on the spot, the proper manufacturer of which you know nothing about, when you can, upon altogether as good terms and better, readily supply yourselves from settled, responsible establishments, of twenty years' standing, whose instruments have been tested a thousand times over.

Ten miles South of Clarksville, Va.,
R. H. GRAVES, PRINCIPAL.
THE PRINCIPAL, AFTER TEACHING TWO years, having determined to establish a permanent School in this country, selected the above location, which he had carefully examined, as being the healthiest and most suitable for the purpose designed, and especially for its adaptedness to the health and the advantages of social, moral and religious intercourse. To attain these ends, though at the expense of temporarily a new place, the site was procured in the midst of a community noted for intelligence, refinement and moral worth, remote from stores, tipling shops, and other places of temptation to extravagance and vice.
The School has been two years in successful operation, and the character of the location above given, is freely awarded to it by all acquainted therewith.
Board can be had in families of the highest respectability.
As the number of classes is limited, it is important that applicants state the progress already made.

PLAN OF THE LOTTERY!
The numbers from 1 to 50,000, corresponding with those numbers on the Tickets printed in separate slips of paper, are enclosed with small tin tubes and placed in one Wheel.
The first 365 prizes, similarly printed and enclosed, are placed in another wheel.
The wheels are then revolved, and a number is drawn from the wheel of numbers, and at the same time a prize is drawn from the other wheel. The number and prize drawn out are opened and exhibited to the audience, and registered by the Commissioners; the prize being placed against the number drawn. This operation is repeated until all the prizes are drawn out.
Approximating Prizes.—The two preceding and the two succeeding numbers to those drawing the first 6 prizes will be entitled to the 32 Approximating Prizes. For example: If Ticket No. 11250 draws the $60,000 prize, those Tickets numbered 11248, 11249, 11251, 11252, will each be entitled to $300. If Ticket No. 550 draws the $30,000 prize, those Tickets numbered 548, 549, 551, 552, will each be entitled to $250, and so on according to the above scheme.
The 5,400 Prizes of $20 will be determined by the last figure of the number that draws the $60,000 prize. For example: if the number drawing the $60,000 prize ends with No. 1, then all the Tickets, where the number ends in 1, will be entitled to $20.—If the number ends with No. 2, then all the Tickets where the number ends in 2 will be the entitled to $20, and so on to 0.
Certificates of Packages will be sold at the following rates, which is the risk:

Certificate of Packages of	10 Whole Tickets,	$50
" "	10 Half "	40

" "	10 Eighth "	10
