THE superior merits of the "Singer" Machines over all others, for either *family use or manufacturing purposes*, are so well established, and so generally admitted, that an enumeration of their relative excellences is no longer considered necessary.

The machine in question is simple, compact, durable and beautiful. It is quiet, light-running and capable of performing a range and variety of work never before attempted upon a single machine,—using either silk, twist, linen or cotton thread, and sewing with equal facility the vest FINEST and coarsest materials, and anything between the two extremes, in the most beautiful and substantial manner.
