JOSIAH TURNER, Jr., EDITOR.

SWEPSON AND LITTLEFIELD.

The Governor, in his proclamation calling for the presence of his two absent friends, under the authority of the act of the Legislature to restore the credit of the State and facilitate the construction of our Railroads, draws it very mildly. He fails to inform his absent friends of the penalty for non-compliance with the provisions of the act. This is the more reprehensible, as it is hardly possible that his absent friends can become acquainted with these penalties, for we believe committees have been here to be unable to ferret out their whereabouts, and we cannot suppose that the Governor can be apprised of their present locality, or, as the guardian of the State's honor and interests, he would voluntarily inform the Legislative investigating committees and the suffering officers and employes of the Western Division of the Western North Carolina Railroad. The act is too long for publication here. Suffice to say it requires all Presidents of Railroads in which the State has an interest to make a full statement of the finds affairs within twenty days after the notice is served, which is required to be done within five days after its ratification. Those residing out of the State to be notified by advertisement. Hence the notice to Swepson and Littlefield. The ninth section provides that "if the President or other officers of any Railroad Company in which the State is interested, within the provision of the first five sections of this act shall willfully refuse or fail to comply with the said provisions thereof, every such President or other officer shall be deemed guilty of felony, and upon conviction, shall suffer imprisonment in the State's prison for not less than five years." We give Governor Holden's absent friends the advantage of our circumlocution to advise them of their danger. It is will cause the exiling of these two personages from the State we don't think North Carolina will lose much if we never hear of the seven millions of State bonds supposed to be in their possession.—*Wilmington Journal.*

A STRANGE EPIDEMIC.

An epidemic, classed by the medical profession as the "relapsing fever"—a disease hitherto unknown in the United States—has, within the last two or three months, made its appearance in the city of New York, occurring among the most destitute classes.

Epidemics of the disease have occurred frequently abroad, in Germany, Russia and the British Isles. Like typhus, it is a famine fever, occurring in times of general distress, and attacking in the first place, the poorest classes of the community. Those who keep up with the medical literature of the day, have noted several months back that this disease had made its appearance in London, and that numerous cases had been then received into the hospitals. Thence it has doubtless been brought, in spite of quarantine regulations, to our own country. The complaint ordinarily begins with a severe chill, followed by the usual phenomena of fever. These continue to increase until after three, four or five, or sometimes six days' copious perspiration terminates the attack. The patient remains free of the fever, though often feeble and ailing. About the fourteenth day from the commencement of the attack, a second chill supervenes, followed by phenomena similar to those of the first attack. Sometimes a second relapse occurs about the twenty-first day, and cases are recorded in which a third and even a fourth have been observed. Though during the fever the symptoms are violent and the pulse very frequent, and the temperature high, the disease is attended with comparatively little danger, the mortality commonly not exceeding four or five per cent. It spreads by contagion like other pestilences. When it once becomes epidemic, the cases are by no means confined to the poor and needy.

THE AGE OF OUR WORLD.—Among the astonishing discoveries of modern science, is that of the immense periods that have passed in the gradual formation of the earth So vast were the cycles of the time preceding even the appearance of man on the surface of our globe, that our own period seems as yesterday when compared with the epochs that have gone before it. Had we only the evidence of the deposits of rocks shaped upon each other in regular strata by the accumulated materials, they alone would convince us of the slow maturing of God's works on earth; but when we add to these the successive population of whose life this world has been the theatre and whose remains are hidden in the rocks into which the mud, or soil of whatever kind, on which they lived, has hardened in the course of time—or the enormous chains of mountains whose upheaval divided these periods of gradual accumulation by great convulsions—or the changes of different nature in configurations of our globe, as the sinking of lands beneath the ocean, or the gradual raising of continents and islands above—or the slow growth of the coral reefs, those wonderful sea-walls raised by the little ocean architects who in own bodies furnish the building stones and the cement that binds them together, and who have worked so busily during the long centuries, that there are extensive countries, mountain chains, islands and long lines of coast consisting solely of the remains—of the countless forests that have grown up, flourished and decayed, to fill the storehouses with coal that feed the fires of the human race if we consider all these records of the past, the intellect fails to grasp a chronology of which our experience furnishes no data, and time that lies behind us seems as much as eternity to our conception, as the future that stretches indefinitely before us.—*Agassiz.*

We learn that a trader named John W. Stills said to be from Watauga county, died quite suddenly a few nights since under peculiar circumstances. Passing with his team through Rockingham county, he stopped for the night by the side of a creek to camp. Before retiring to rest, he swallowed a dose of medicine purchased the previous day from a travelling peddler as a specific for rheumatism. In about an hour, his stertorous breathing—observed by companions, who listened for another snore, but heard it never—gave the intimation that his spirit was gone. Mr. Stills was about forty years of age, and leaves a family.—*Salem Press.*

KEROSENE LIGHTS PERFECTED!

DANFORD'S

Atmospheric

KEROSENE LAMP.

THE ONLY PERFECTLY SAFE LAMP IN USE.

Artificial Light, of some sort, is a universal necessity; a safe, cheap, and brilliant one is a luxury; a luxury, too, only enjoyed heretofore by those living in large towns or cities where Gas is used. Years of art, and thousands of dollars annually have been spent by experimenters of different kinds, in trying to invent and perfect a Burner or Lamp by which Coal Oil or Kerosene could be burned practicably without the expense and trouble of chimneys; this long looked for and much desired subject has at last been obtained, and is styled the

ATMOSPHERIC KEROSENE LAMP!

Its adaptation to Dwellings, Churches, Railroads, Steamboats, Hotels, Stores, &c., is unsurpassed; in short, this invention brings the luxurious and brilliant Gas Light within the reach of all, whether in the City or Country. It gives the light of a six-foot Gas Burner, for less than one cent per hour, or double the quantity of light of the ordinary chimney lamp with one third less oil; will burn, when turned down to a taper light ten hours for one cent; is free from smoke or smell; can be carried from room to room; the wind will not blow it out.

This Lamp is destined to supersede all portable artificial light or chimney lamps now in use and needs only to be seen to be appreciated; thousand of them will find ready sale in every county, no family that uses this light for one evening will again be annoyed with the chimney-lamps. Thousands of them will be used in cities, as the light is one-half cheaper than Coal Gas, and much more pleasant to the eye.

The sole right for the sale of this Lamp can be had for the entire State or the same will be sold by Counties.

Parties purchasing will be supplied, at wholesale, with the lamp and fixtures at reasonable rates.

Immediate application should be made to secure the choice of Counties.

The Lamp can be seen in full operation during the day and evening at the Fayetteville House.

All letters will receive prompt attention and full explanation of the Lamp given.

SAW MILLS.

I AM PREPARED TO PUT UP DOUBLE OR single Saw Mills, in workmanlike manner for those desiring them.

There are now 440 of these Mills in operation, and in no case have they failed to give entire satisfaction. One advantage of mine Mill is, that the sawyer, without changing his position, gives the backward and forward motion to the carriage with a single lever, and set the log at both saws at the same time, thus a saving of one half of the mill. This is no humbug. I am responsible for what I say. My residence is 20 miles South of Raleigh, on Neal's Creek. For further particulars address me at Raleigh, N. C.

F. J. WRAY.

I will be at Tyson Adams' Store on the 2nd to the 5th of February, where persons desiring to see me will please call.

READ THE FOLLOWING.

Mr. F. J. Wray, Dear Sir:—I am quite pleased with my double Circular Saw Mill, built by you. I can cut a line Mahogany Log, 30 feet long, in 10 minutes, with my 12 feet overshot wheel. We have to-day sawed 3,000 feet weatherboarding, flooring and inch boards, in eight hours.

Dec 23rd 1869. SAMUEL DOSS FARRIS.

Mr. F. J. Wray:—We are well pleased with our new double Saw Mill, and you, as a man to deal with. We can cut from 2,000 to 3,000 feet of lumber per day, with the old Mill, or as much as any sawmill in Miami.

F. TATE,
SAMUEL TATE.

The last purchased Mill has proved to be all that is represented.

You are hereby notified and required, within twenty days from the publication of this notice to file before the Governor and Superintendent of Public Works a statement showing the following items:

1. What amount of bonds of the State were received by such President or other officer, from the Public Treasurer, or from any predecessor in office of such President or other officer, with the respective dates of such reception.

2. What amount of such bonds have been sold, in what markets, and at what prices, with the respective dates of such sales.

3. What amount of such bond have been, or are now, hypothecated, to whom as hypothecated, when hypothecated, for what purpose, and what amount of money has been received by such hypothecation.

4. What amount of such bonds remain on hand unsold, or have been turned over and held to any successor of such President or other officer, and whether any interest, and if any, how much has been received by him on any such bonds of the State."

"Sec. 2. It shall be further the duty of every President or other officer of a Rail Road, as provided in section first of this act, and every such President or other officer is hereby required to return to the Public Treasurer, subject to the joint order of the Governor and Superintendent of Public Works, as hereinafter prescribed, all bonds of the State which have been issued under any authority of law, and which may be in the hands of any such President or other officer unsold or unhypothecated, or in case any such bonds have been sold or exchanged for money or other securities, the said President or other officer shall deposit in the Public Treasury such money, proceeds, or securities, or so much thereof, as he has not actually expended upon his Road."

Your attention is also particularly directed to the provisions of section 2, section 4, section 5 and section 9 of the Act above mentioned.

Very respectfully,

W. W. HOLDEN,

Governor.
