THE DEFEAT OF THE GLADSTONE MINISTRY—"WHAT WILL THE OPPOSITION DO WITH IT?"

LONDON, March 13.

The journals this morning comment at great length on the defeat of the government on the Irish University Educational bill, and speculate upon the course Mr. Gladstone will pursue.

The Tories say the cabinet will probably resign to day and Disraeli will be called by the Queen to form a new ministry, in which event parliament will be dissolved and a general election ordered before July.

The *Post* says the Government has not determined whether it will resign or dissolve parliament and appeal to the country.

The vote on Gladstone's bill was a great surprise to the Cabinet and liberal members of the House of Commons. The latter was desirous of upholding the ministry by a vote of confidence. The conservatives are unwilling to accept the responsibility of a dissolution of Parliament.

The session of the House of Commons to-day is looked forward to with great anxiety, as Mr. Gladstone will then announce the course decided upon by the ministry.

FROM WASHINGTON.

WASHINGTON, March 13.

The Attorney General has a dispatch from Detective Whitley that the postmaster and county officers have been driven from Lake City, Florida. One leader in the affray has been arrested. Federal officers are investigating the affair.

It is reported that Dr. Newman, Chaplain of the Senate, has been appointed Inspector of casualties and will make a trip round the world.

The deficiency appropriations have compelled a draft on the legal reserve of $1,200,000. It is reported it may be necessary to use $3,000,000, but only temporarily.

The Southern claims passed upon by the Commission, and for which appropriations have been made, aggregate $820,000, distributed among about one thousand claimants, mostly in Virginia, Tennessee and Alabama. Deducting eight larger cases, the average is $400.

President Grant has gone to Philadelphia. [illegible] will return to-morrow.

Mr. West submitted a resolution compensating McMillan and Ray, elected from Louisiana. Referred to the Committee on Privileges and Elections.

Caldwell's case occupied the balance of the day. No action.

FOREIGN NEWS.

GERMAN AFRICAN EXPLORATION.

LONDON, March 13.

The German Geological Societies propose to send an expedition to explore Western Africa and supplement the discoveries of Livingston. Considerable sums of money have been already raised to meet the expenses of the undertaking.

FINANCIAL CLAIMS IN CUBA.

HAVANA, March 13.

The Directors of the Political Club and the Spanish Casino, invited a number of wealthy citizens and leading financiers to a conference on Monday evening, at which the condition of the treasury was taken under consideration. The Directors submitted a proposal in view of the insufficiency of the 20,000,000 loan, that the portion which remained untaken be divided among the tax-payers according to the amount of tax paid by each. The directors stated the Casino would also attempt to introduce a plan to the consideration of the property holders and moneyed men of the island.

There was considerable discussion at the conference but no resolution was adopted. The proposition meets with much opposition. The distribution of the untaken bonds among the tax payers is regarded in the light of a forced loan, all the more objectionable as it falls heavily on the less wealthy classes. On the streets, the people denounce it, declaring that coercion to take the loan is against their interests as well as contrary to law.

Informal meetings of foreigner and Spanish merchants have been privately held, at which it was resolved to oppose the plan; and foreign consuls will protest in case it is insisted upon.

Prominent Spaniards represent that the object is to make those patriots, who boast loudly of their devotion to Spain, and make a show in supporting her interests, take some share of the burdens imposed by the war for the preservation of their country's power.

RESIGNATION OF THE GLADSTONE MINISTRY.

DISRAELI SUMMONED TO FORM A NEW MINISTRY.

LONDON, March 13.

Mr. Gladstone in the House of Commons and Earl Granville in the House of Lords this afternoon announced that the Ministers had tendered to the Queen their resignations, which her Majesty had accepted.

Both Houses then adjourned till Monday.

Mr. Disraeli to-day received a summons from the Queen and immediately proceeded to Buckingham Palace.

THE SHIELD OF HEALTH.

Debility opens the door to disease. Nor is this all. When the door has been opened and the terrible intruder has entered, physical prostration renders its progress to the citadel of life comparatively easy. Therefore bar the door, and if possible, keep it barred; or, if the enemy has already secured a foothold, rally the strength of the system and assist nature to drive out the foe of health and life. The means of doing this is within every one's reach. Brace up the physique with Hostetter's Stomach Bitters when there are elements in the air you breathe or the water you drink that are morbid or unwholesome. This is barring the door. Epidemics and endemics will assail in vain the living fortress that is thus protected. It may "laugh a siege to scorn." But if this precautionary measure has been neglected, the seed of disease can be ejected by the same potent vegetable agent that would, if taken earlier, have prevented their obtaining an entrance into the system. The stimulating, invigorating, regulating and purifying properties of this vital elixir render it a most formidable antagonist of all debilitating disorders. The rapidity and certainty with which it vanquishes fever and ague, rheumatism, bilious colic, indigestion and nervous complaints, is due in no small degree to the strength it imparts to the muscular fibre, the nerves and the membranes which line the stomach and the bowels. It may be safely said that a course of the bitters commenced now will be a sure protection against most of the complaints incident to the season.

WE WILL ESTABLISH OTHER AGENCIES AT DIFFERENT LOCALITIES THE COMING SEASON.

THE COTTON FERTILIZER has received the highest praise from all sections of country and the DAILY PRESS throughout the State. We give below a few extracts from communications of correspondents in various localities of country to the daily news, as are reporting the voluntary, concordant commendations of the cotton planters relative to the action of the Cotton Fertilizer, and the high repute in which it is held by the planters, as matter of public interest and benefit—writing from the spot and giving the free, exhaustant testimonies of the whole people, who had tried and seen its effects, many of whom are the best men, and most successful farmers in North Carolina and Virginia. These extracts are the DISINTERESTED REPORTS of newspaper correspondents in their communications to the Press, whose business is to note and relate matters of general news and interest of public importance and concern.

OPINIONS OF THE PRESS.

Extract from correspondent of the Littleboro' Advance, (Nash county,) in its issue of the 22d of August last:

"* * * Of the commercial manures used through our section, it is the opinion of those who have applied it that Gilham's Cotton Fertilizer, manufactured by the Southern Fertilizing Company, Richmond, Va., is decidedly the best in the market."

From the Raleigh Sentinel of August 14th, we make the following extract:

"* * * In conclusion allow me to speak of the favorable impression among our excellent farmers created by Gilham's Cotton Fertilizer. No section of the State can produce an COTTON EQUAL TO RIDGEMOR, and many of them say this Cotton Fertilizer is equal, and some of them say superior, to Peruvian. This is saying much for it, but it is one to be gilded by the many crops around here, which show its excellencies, we have not answered it too high praise. Nothing is more necessary than a good fertilizer, and we inform our readers of the effects of this fertilizer, and the high opinion of it by the cotton planters in this section for the benefit of the farming interest throughout the state."

From a correspondent of the Tarboro' Enquirer, writing from Battleboro', N. C., we make this extract from an article in that paper of the 31st August last:

"* * * Gilham's Cotton Fertilizer is recognized by some of the best plants here to be the best manure used in this section."

From a correspondent from Margarettsville to the Raleigh News, August 27th, we note this paragraph:

"Most of the farmers who used Gilham's Cotton Fertilizer say it is better for many reasons, than Peruvian Guano. We were struck by the high repute in which this fertilizer is held by those who have used, and are now using it, and the good opinion entertained, by those who have witnessed its effects since cotton. It is unquestionably very marked."

From a communication from Whitakers to the Biblical Recorder, we make the following quotation:

"On asking the farmers' opinion as to the manure all who have used it pronounce Gilham's Cotton Fertilizer the best; saying it stands very weather better than the Peruvian, is equal to it in every respect, and asking it is more, with due success express their intention of using it again. This is saying a good deal for the Gilham's, inasmuch as Peruvian costs much more, and has stood so long without a rival, but facts are stubborn things."

All communications must be addressed to C. W. GRANDY & SONS, Special Agents, Norfolk, Virginia.

DIAMOND SPECTACLES.

The spectacles are manufactured from "Minnie Crystal Pebbles" melted together, and are valued themselves on account of their hardness and brilliancy. It is well known that spectacles cut from Brazilian or Rock pebbles are very injurious to the eye, because of their polarizing light. Having been tested with the polariscope, the diamond lenses have been found to admit fifteen per cent. less heated rays than any other glasses. They are ground with great mathematical accuracy, are free from annoying chromatic aberration, and produce a brightness and distinctness of vision not before attained in spectacles. Manufactured by the Spencer Optical Manufacturing Company, New York. For sale by responsible agents in every city in the Union.
