Dr. B. MUNSEY,

Surgical and Mechanical Dentist.

WOULD respectfully inform the inhabitants of Wilmington and vicinity, that he has taken a Room at London's building, Front street, East side, No 6, where he is prepared to perform all operations pertaining to his profession in the most approved modern and scientific manner, which for utility and beauty, he will warrant not to be excelled by any in the practice, such as

INSERTING FILLING, CLEANSING,
Regulating, Extracting, &c.

He will insert the best of Mineral or Porcelain Teeth, with Gum if desired, which will so closely resemble those of Nature that the most practiced eye will be unable to detect them.

Filling Teeth before decay has exposed the nerve, is one of the most valuable operations belonging to the Dental art. When properly and skillfully performed, it perfectly restores the tooth to its former beauty and durability—than which no operation in Surgery can be more grateful and satisfactory. Cases are not unfrequent when the nerve has been destroyed and the tooth plugged and preserved for years, and even during life without causing any pain or inconvenience.

Cleansing Teeth of tartar, a very destructive calcarious concretion, and other corroding agents, is emphatically called for by those who wish to preserve these useful and beautifying organs. This may be done without any possible injury to the enamel and entirely restore them to their original health and brilliancy.

Dr. M. will be happy to wait upon all requiring his professional services and freely impart any information which they require pertaining to his profession. ALSO, the diseases of the Mouth and Gums.

At the same time he assures the public that he makes use of none but the best materials which dental science has produced. Specimens and recommendations at the office if requested. Call and see.
