The Farming Guide

By A. S. KNOWLES

County Agricultural Agent

Farmers should make sure that they file an application for tax refund for the gasoline used in farming. The Federal Tax period covers July 1, 1961 through June 30, 1962, and the State Tax period is from January 1, 1962 through June 30, 1962.

Those farmers filing an application last year should receive another application in mail. Those that do not have one may get an application from the office of the County Agricultural Agent in Supply. These applications must be filed before October 1, 1962.

A number of tobacco growers have completed their harvest. One of the best nematode control practices is to plow up the tobacco roots for exposure to the sun. This should be done as soon as the crop is harvested to prevent feeding and development of nematodes.

In case there were known losses from nematodes, it would be advisable to check the roots of several rows to determine the degree of damage—light, heavy or none. A definite field management practice can be recommended when the degree of population is known. The Extension Service will assist anyone interested in working out a specific program.

It is obvious that those few farmers that didn't top and sucker their tobacco will loose from $100 to $300 per acre. Come on! Let's do the best job possible . . . on the production, curing, and marketing of our tobacco crop.

Order forest tree seedling now in order to have them for setting on time this fall and winter. Be sure to see the ASCS office in Shallotte between August 20 and August 31, 1962 to get funds set up for tree planting practice on your farm. Then get applications and order trees at once.
