MOUNTAIN HOTEL,
Morganton, N. C.
THIS ESTABLISHMENT continues open for the reception of the travelling public. Its character as a FIRST CLASS Hotel; its admirable location, as regards coolness and quietness, being remote from the noise and bustle of Court Squares, and the disorder of the drinking Establishments, in that vicinity; its fine Mountain views and receiving the Mountain air, fresh and unobstructed, and yet being near enough to the public Square for any object of business, are too well known to admit of further commendation. The proprietor has added and is still adding to its comfort and conveniences, and hopes to merit, and continue to receive, the very large share of public patronage which he has formerly had.
J. M. HAPPOLDT.
N. B. Persons desirous of coming from Charlotte to Morganton will find ready facilities of transportation, there being a daily line of Stages from Charlotte to Lincolnton. At Lincolnton, Col. B. J. Lindsey's Double Acting
Rotary Force Pump.
THE PUMP HAS JUST BEEN PATENTED in America and England, and for excess any pump heretofore invented; its pumpkeeper are simplicity, power and cheapness. Its simplicity there is nothing about it but iron and cast metal, and it can be taken apart and put up by any one, and will last for an age. It has the power to raise water, kerosene or rosy. This pump is from 21 to 30 inches in diameter and must set in the well or water. Water rises in it by hand 100 feet per minute! For cheapness: a No. 1 pump (for all ordinary purposes) complete, and 30 feet of pipe, costs but $20! The handle at the top turns the pipe and pump, and very resolution fills the cylinder twice, affording an abundant supply of water with the least possible expense and labor. It is peculiarly adapted to deep wells, *railroad stations, mining and manufacturing purposes.* This pump does not throw water, and is guarded against freezing and rust. Practical and scientific men pronounce it as without an equal, for all that is here claimed for it. The "Scientific American," after seeing it in operation, says: "This pump is very simple in the construction, not liable to get out of order, durable, easily operated and economical; we regard it as an excellent improvement." Circulars, with an accurate drawing and full description, sent free of charge to all parts of the country. No. 1, has a one inch pipe; No. 2, 1¼ inches; No. 3, 1¼ inches; and the prices, with 50 feet of pipe, $20, $42, and $64; the No. 2 and 3 are designed for every deep well, railroad stations, &c., where much water is required. The subscriber is the general agent for the sale of these pumps to all parts of the world, and EXCLUSIVE AGENT for New York. Orders must be accompanied by the cash, and should be explicit as to the kind of pump wanted, depth of well, shipping, address, &c. They will meet prompt attention. A pump and pipe weighs about one hundred and seventy pounds. No charge for shipping or cartage. Wells over fifty feet should have extra gearing, which costs $3.
