Mitchell's Geography and Atlas.

This excellent work, published about one year ago, by Thomas Cowperthwait, & Co. of Philadelphia, has steadily obtained a patronage almost unparalleled. It has deservedly received the approbation and recommendation not only of numerous professors in our best academies and schools, but of many literary gentlemen in private life. So great has been the demand for this work, particularly by schools and academies, that the enterprising publishers have recently incurred the additional expense, (thereby rendering it still more valuable,) of adding the additional maps to the Atlas, the one comprehending Great Britain and Ireland, and the other Germany, Switzerland and Northern Italy. It is unnecessary to add anything further than to say, that this is the best compiled and most correct School Geography and Atlas which has ever been presented to the public.

U. S. Gazette.

Mitchell's Primary Geography.

It would seem that Mr. Mitchell's enterprise, industry and desire to do good to the rising generation is unbounded, he having just completed another most excellent work for younger pupils, (which is published by the same booksellers as the above,) entitled Mitchell's Primary Geography, being an easy introduction to the study of geography, designed for the instruction of children in schools and families. This is a beautiful little work, well printed, and containing one hundred and seventy-six pages, illustrated by one hundred and twenty engravings, and fourteen colored maps. Every child from seven to ten or twelve years old, should have this book, and it should be introduced immediately into every primary school in our country. It is divided into eighty-three lessons, some of which relate to astronomy. It is designed as a first book of geography for children as soon as they are old enough to comprehend it.—It is simple in its arrangements and beautifully elucidates the geography of our own and the other countries of the earth, and is decidedly superior to any geography for primary schools which has ever been published.—*Ib.*

NEW JEWELLERY STORE,

JOHN C. PALMER has commenced the above business in the new building lately erected by Mr. Richard Smith on Fayetteville Street, a few doors above his Store, where he intends to carry it on, in all its branches. He keeps constantly on hand (of the very best quality) a new and fashionable assortment of Jewellery and Watches and Cutlery, consisting of gold and silver Levers and plain Watch Chains, Keys and Seals, Ear Rings, Pins, a fine assortment of Knives and Razors and other articles not necessary to mention, all of which he engages to sell as cheap for cash as they can be sold in this part of the country.

Watches repaired in the best manner. He flatters himself from the long experience in the business, that he will be able to give satisfaction. He has in his employ first rate workmen. Watches & Clocks that can be made to keep time, will be warranted for a couple months. He hopes the citizens of Raleigh and country around, will call and give him a trial and judge out for themselves. Call at the sign of the watch, nearly opposite the Log Cabin.

EDUCATION.

THE Trustees of the Smithfield Academy, Johnston Country, have engaged the services of Mr. J. H. Brooks for the next year, to superintend the above institution, and would call the attention of Parents and Guardians to the advantages which our pleasant village, good society, and healthful situation affords for educating their children and wards. Mr. Brooks is a graduate of Wake Forest College, and has given practical evidence of his "aptness to teach"—is a man of unblemished moral character, and a Minister of the Gospel, and expects to make School teaching the main business of his future life, and will spare no pains to procure for himself such a reputation as will always insure business in his profession. Board, including washing, lodging, &c. may be had in the families in and about the village, at six dollars per month. Constant attention will be given by the Teacher and Trustees to the good management of the school and morals of the students. Prices of Tuition, as follows:

HAYS' LINIMENT.

NO FICTION—This extraordinary chemical composition, the result of science and the invention of a celebrated medical man, the introduction of which to the public was invested with the solemnity of a death-bed bequest, has since gained a reputation unparalleled, fully sustained the correctness of the the lamented Dr. Gridley's last confession, that "he dared not die without giving to posterity the benefit of his knowlede on this subject," and he therefore bequeathed to his friend and attendant Solomon Hays, the secret of his discovery.

It is now used in the principle hospitals, and the private practice in our country, first and most certainly for the cure of the *Piles*, and also extensively and effectually as to baffle credulity, unless where its effects are witnessed.

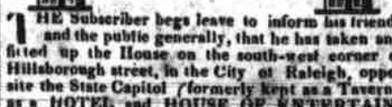
A CARD.



THE Subscriber begs leave to inform his friends and the public generally, that he has taken and fitted up the House on the south-west corner of Hillsborough street, in the City of Raleigh, opposite the State Capitol (formerly kept as a Tavern) as a HOTEL and HOUSE OF ENTERTAINMENT, for the accommodation of travellers and others, under the name and title of

"THE PEOPLE'S HOUSE."

The undersigned has had considerable experience as an Inn-keeper, both in this State and at the North, and flatters himself that he can please those who shall honor him with their custom. His charges shall be in conformity with the times and the prices of provisions. He has been at much expense in repairing and refitting the same, and therefore earnestly solicits a share of public patronage. It is usual in such announcements, to make large promises to the public, which are in many instances never realized—the subscriber will make none, for to those who have known him as a Public House-keeper, it is unnecessary; and to those who do not, he would respectfully say, *come and try, and judge for yourselves.* The Public's humble servant,

JOHN ZEIGENFUSS.
