Mrs. Howell Honors Visiting D.A.R. Officials

Mrs. James Harden Howell, Sr., was hostess of a dinner at her home, "Windover" last night as a courtesy to the state and district officers of the Daughters of the American Revolution who are her house guests while here to attend the celebration of the fiftieth anniversary of the founding of the Dorcas Bell Love Chapter.

The honor guests were Miss Gertrude Carraway of New Bern, state regent; Miss Virginia Horne of Wadesboro, state vice regent; Mrs. Edward Bower of Hendersonville, state chairman of approved schools; and Mrs. J. F. Jonas of Marion, district director.

The home was decorated throughout with early spring flowers. Arrangements of forsythia, jasmine and iris were used in the entrance hall and living rooms and the dining tables were centered with vases of japonica and camellias.

Attending the dinner in addition to the guests of honor were the following members of the Dorcas Bell Love Chapter, American Revolution: Mrs. J. W. Killian, Mrs. James R. Boyd, Mrs. J. M. Long, Mrs. W. F. Swift, Mrs. James E. Henderson of Canton, Mrs. James H. Howell, Jr., Mrs. Charles E. Quinlan, Mrs. S. H. Bushnell, Mrs. J. F. Abel, Mrs. R. N. Barber, Mrs. W. A. Hyatt, Mrs. E. J. Hyatt, Mrs. R. L. Prevost, Mrs. John Queen, Mrs. James Atwood, Mrs. Frank Kinsey, Mrs. Lee Harold, Mrs. Dan Moore of Sylva, Mrs. Charles Ray, Mrs. Ben Colkitt, and Mrs. Margaret Stringfield.

Henry Fox arrived Wednesday from Clemson College to spend several days with his mother, Mrs. Henry Fox, Sr., before the opening of the second semester at the college.

* * *

Mrs. N. F. Lancaster has returned after a visit to relatives in Richmond, Virginia.

* * *

Mrs. Fred L. Wilson and daughter, Nancy, of Black Mountain were week-end guests of Mrs. Wilson's sister, Mrs. Ed Glavich and Mr. Glavich.

* * *

Mrs. L. M. Killian left last week for a visit to her son-in-law and daughter, Mr. and Mrs. Harold Tineen, at Fuquay Springs.

* * *

Misses Amelia and Louise MacFadyen of Waynesville and their sister, Mrs. J. T. Bailey of Canton, left Tuesday for a visit in Orlando, Florida.

If Your Nose Fills Up—Spoils Sleep

Tonight—if your head is so congested and stuffed-up with a cold that you can't get to sleep—put a few drops of Vicks Va-tro-nol in each nostril.

Instantly you'll feel your stuffy nose start to open up. For Va-tro-nol's *specialized* medication works *right where trouble* is to relieve such congestion. It makes breathing easier. It invites restful sleep. Try it. Get Vicks Va-tro-nol Nose Drops!

Clyde Home Club Has Meeting On Tuesday

The Clyde Home Demonstration Club met on Tuesday afternoon at the home of Mrs. Levi Morgan, with Mrs. R. Leatherwood and Mrs. R. L. Hennessee as co-hostesses.

Mrs. C. E. Brown, Jr. presided during the business session and Miss Mary Margaret Smith gave the demonstration.

Project leaders reported as follows: poultry, Mrs. Gene Medford; gardens and home beautification, Mrs. J. R. Rogers; food preservation, Mrs. Frank Holcombe; crafts, Mrs. Roy Medford; health, Mrs. J. W. Harris; and clothing, Mrs. Pat Cole.

Library Notes

MARGARET JOHNSTON
County Librarian

Fiftieth Anniversary

The Library would like to congratulate the Dorcas Bell Love Chapter of the Daughters of the American Revolution on the their Fiftieth Anniversary.

I went back in their record at the Library to see what I could find for an exhibit. You will be surprised at how interesting fifty years of an organization can be—even to an outsider. I found myself wishing that all the records were complete, but unfortunately they aren't and sometimes our memories are not too good.

I found the Charter, the first Registrar's Book and many of the Yearbooks dating back to 1910. When was the first? Then, too, there were a few of the Secretary's books.

The record of achievements show many accomplishments, but to me the finding of the **Lineage Books of the Daughters of the American Revolution** in a place of this size has been very surprising. I am proud that the organization realized their value for reference and purchased them for our Library. I couldn't find when they were started, but I found that by 1924 they had purchased 72 Volumes.

Incidentally there are just 166 volumes and 3 index volumes giving informational data on members from 1890-1921. This set is complete except for volume 40 which we have been unable to replace. Many a larger library would envy us this valuable means of looking up lineage records.

Another achievement of interest to me is the Declamation Contest on Washington's Birthday which began in 1909 with Noble Garrett as winner.

I hope you will join us in honoring this organization by visiting the exhibit in the Library to see the Charter, Yearbooks, List of Declamation Winners, together with other interesting items from their history and books on the Revolutionary Period.

UNVEIL PLAQUE TO MEMORY OF MARK HELLINGER

GATHERED IN THE LOBBY of the Mark Hellinger Theatre in New York, the widow and friends of the late newspaper columnist and movie producer stand before a plaque dedicated to his memory. Shown after the unveiling ceremony (l. to r.) are: Mrs. Arthur Gottlieb, who was Hellinger's wife; columnist Walter Winchell, who wrote the inscription; George Jessel (foreground); Quentin Reynolds and Mrs. Louise Baer, wife of the humorist "Bugs" Baer. The New York Heart Association arranged the unveiling. *(International)*

Babson Sees Possibility Of 'Free Foods' Coming From New Atomic Findings

BABSON PARK, Fla.—While we all are worrying about Russia and World War III, we must not forget that **at any time** some great revolutionary invention may develop which will take everyone's attention, for awhile, **off of** Capitalism, Communism and every other "ism". I have in mind electronic experiments to greatly reduce the cost of canned fruit, vegetable and other juices whereby the new mineralized electrically enriched product will be more tasty and healthier than the present commercial products.

Photosynthesis Explained

Your value is measured by your **energy**, although this may be **spiritual** energy, **mental** energy or **physical** energy. This last shows itself in farm work, road and building construction, factory and office jobs and even home cooking or bed making! **To develop energy** is the reason for eating, drinking and breathing. Upon this need of food for **energy**, the agriculture of every nation is based and, in fact exists.

But from where does your energy come? It comes from the Sun in a wonderful way. The Sun's electrical energy, supplemented by air, water and minerals, is stored by photosynthesis in the **vegetable** products which we eat. After eating by a reverse process, this Sun's energy is turned back again into human energy by electrical forces within our bodies. This is the entire story if you are a vegetarian. In case you eat meat, fish, eggs, etc., then there is also another intermediate process; but even then your energy really comes from the Sun.

Sun, water and air are already free. Hence, it will be necessary only to spend a very little for mineral and certain electric rays—to create human energy. This might make it unnecessary for us to eat the products of the soil except for bulk and as luxuries. Our appetites would be satisfied electronically and we would need never be hungry.

I believe that one of the laboratories of the Atomic Commission is now working on such a dream. The carbon atoms may show the way. With such a discovery there would need be no fundamental change in our present physical set-up. We would continue to get our energy from the Sun; but a large percentage of the present cost of raising foods would be eliminated. The first step would be to apply these experiments to canned juices of various kinds and later perhaps to dairy products. These will exceed in taste and nutrition certain present products and will give us the Sun's energy in a far cheaper and more efficient manner.

What Would Happen to Business?

What such a discovery would do to us economically I leave to your imagination! A limited amount of farm lands would be wanted for industrial products. Rayon, pulp, plastic and many other manufactured materials will always be dependent upon products of the soil. We, moreover, will continue to demand certain "whole" vegetables and fruits. Our stomachs require bulk which cannot be satisfied by juices or pills. When one considers the labor now engaged in the raising and processing of products now sold as juices, many million people might be thrown out of work and forced into other occupations.

Lands now used for fruit and some other agricultural purposes could decline in value. Railroads which depend largely upon the transportation of certain agricultural prodcts, fertilizers, farm machinery, etc, could suffer. On the other hand, other lines such as building, clothing, fuels, automobiles, recreation and real estate in sunny states could have a great boom. This confirms the need of broad diversification in our investments which I have constantly preached in this column. Of course, this change is not coming all at once. Electronic juice and milk may be healthier than present non-enriched liquids, yet no juices can equal properly grown whole fruit and leafy vegetables of which we should eat much more.

What About World War III?

Such a discovery today could completely upset Russia's plans. With birth control and electronic foods, the arguments for Communism would disappear. Then we could have real world peace and a powerful United Nations. In fact, it is reasonable to believe that scientists at Argonne, Ill., Brookhaven, L. I., and Oak Ridge, Tenn., have this thought as their incentive which keeps them at work.

BELIEVED IN WORK

PHILADELPHIA (U.P.)—When the will of Miss Emeline Maddock was filed for probate, it was disclosed that her two grandnephews would not share in its $25,000 in requests. Miss Maddock explained why. "Too many young men," she wrote, "have been ruined by receiving property for which they never worked."

BIRTHS

The following births have been announced at the Haywood County Hospital during the past week:

Mr. and Mrs. William C. Piercy of Canton, a daughter, January 21.

Mr. and Mrs. Mark Shelton of Waynesville, Route 1, a son, January 21.

Mr. and Mrs. Leo Sanson of Waynesville, a daughter, January 22.

Mr. and Mrs. William Davis of Waynesville, Route 1, a daughter, January 23.

Mr. and Mrs. George Parris of Hazelwood, a daughter, January 24.

Dr. and Mrs. Thomas Stringfield of Waynesville, a son, January 24.

Mr. and Mrs. Max Thompson of Canton, Route 2, a daughter, January 25.

Mr. and Mrs. Max Lee Stamey of Canton, a son, January 25.

Mr. and Mrs. James King of Waynesville, Route 1, a daughter, January 25.

Mr. and Mrs. Ernest Sutton of Hazelwood, a son, January 25.

Mr. and Mrs. Charles Hannah of Clyde, Route 2, a daughter, January 27.

Mr. and Mrs. Harry Harrison of Waynesville, a son, January 27.

Mr. and Mrs. Cohen Matthews of Canton, a daughter, January 27.

Local Man Featured In Movie Short On Everglades In Florida

Lyle Noland, son of Mr. and Mrs. W. B. Noland of Lake Junaluska, will be featured along with his wife, in a movie short entitled, "Adventures of the Everglades" by the Fox-Movietone producers.

The short will be shown at the Park Theatre Tuesday, February 1.

Mr. Noland is pilot of a plane at the Orlando Aviation Club and his wife, the former Miss Lula Davis, is navigator.

The couple are making their home in Orlando, Fla.

Tom Lee is spending this week in Raleigh on business.

Veteran Farmers Make Forestry Field Trip

The veteran farmers training class of Waynesville high school went on a forestry field trip at the Bobby Howell farm in Jonathan Creek Tuesday afternoon.

Approximately 93 farm trainees were present for the tour. John H. Nesbitt, teacher of agriculture at the high school, is instructor for the group.

The first part of the instruction and demonstration was directed by Marvin Smith, T.V.A. Forester and Charles E. Pettit, district forester. During the visit through the woodland, the foresters pointed out the different varieties of trees, trees suitable to location and soil, trees to be left for lumber and material and the diseases of trees.

The second portion of the program was lead by Mr. Pettit and R. E. Caldwell, county forest warden. The damage that forest fires cause to woodland was discussed at length and proper ways of burning brush, fields and woods under permit from forest warden.

Performance Reports Must Be Filed In AAA Office By February 15

The closing dates for filing all 1948 performance reports has been set for Tuesday, February 15, Miss Sarah Fullbright, secretary of Haywood County ACA, has announced.

This performance report is for the purpose of reporting any practice carried out in the 1948 program year. If the farmers of the county have received through the AAA office any lime, phosphate, seeds, it must be reported by February 15.

Failure to report the practices carried out in 1948, the farmer will be subject to a decrease in government assistance, Miss Fullbright said.

Tobacco Allotments For New Land Tracts Must Be Filed Feb. 1

All applications for new burley tobacco growers allotment must be filed in the AAA office by February 1, Miss Sara Fullbright, secretary, said today.

Farmers of the county desiring a base for new tracts of land for the 1949-50 marketing year are urged to come by the AAA office and file applications.

THIEF COMPLETES JOB

ROCK ISLAND, Ill. (U.P.)—R. D. Johnston and his wife managed to salvage a few possessions after a fire in their apartment. A few weeks later, a burglar finished the fire's work. He took the Johnston's remaining property: a mattress, four pillows, two coats and a radio.

Polio Research On Mice Shows Noted Results

Resistance against polio in mice has been increased by feeding the animals oxythiamine, a substance that counters the activity of Vitamin B1, it was reported today by A. P. Ledbetter, Waynesville Chairman of the March of Dimes.

Summarizing the results of polio research during 1948, Mr. Ledbetter said that research conducted at the Children's Hospital of Philadelphia with March of Dimes funds had made a significant advance in understanding the relationship of nutrition to polio resistance.

Scientists have long suspicioned that nutritional factors may be linked with polio. In the past, doctors have noted that often the best nourished, the sturdiest child fell victim to polio. Previous laboratory studies have proved that mice which were kept on low vitamin diets were more resistant to polio than others.

This new result of research, the March of Dimes chairman pointed out, while not immediately applicable to control of polio, is of fundamental importance in the search for a preventive or curative drug.

BOSTON GETS LATE TITIAN

BOSTON (UP)—One of the last of Titian's great printings, "St. Catherine of Alexandria," has been acquired by the Boston Museum of Fine Arts from a German collector. The painting was done about 1568 by the Italian artist and is praised as a typical example of his richness and depth of color and free technique.
