For ALL Your Work Horses

HORSE COLLAR PADS

TAPATCO BRAND

ALL your work horses and mules, all the year around, are best protected from galls, chafes, or bruises on the shoulders by TAPATCO STUFFED COLLAR PADS--soft and pliable.

Stuffed Collar Pads--Why They are Better

Our Stuffed Collar Pads, filled with a specially prepared Composite Stuffing, are soft, absorbent, cushion-like--features not found in unstuffed pads. And Tapatco Stuffed Pads guarantee the greatest degree of protection and make possible the use of badly worn horse collars that would otherwise be thrown away.

Low in Price--Long Lasting

Tapatco Stuffed Collar Pads embody every desirable feature in pad construction. Their constant use is real economy. They cost so little and do so much that no one should work a horse or mule without them.

For Sale by Dealers

We also make a complete line of Riding Saddle Pads and Padded Back Bands

The American Pad & Textile Co.

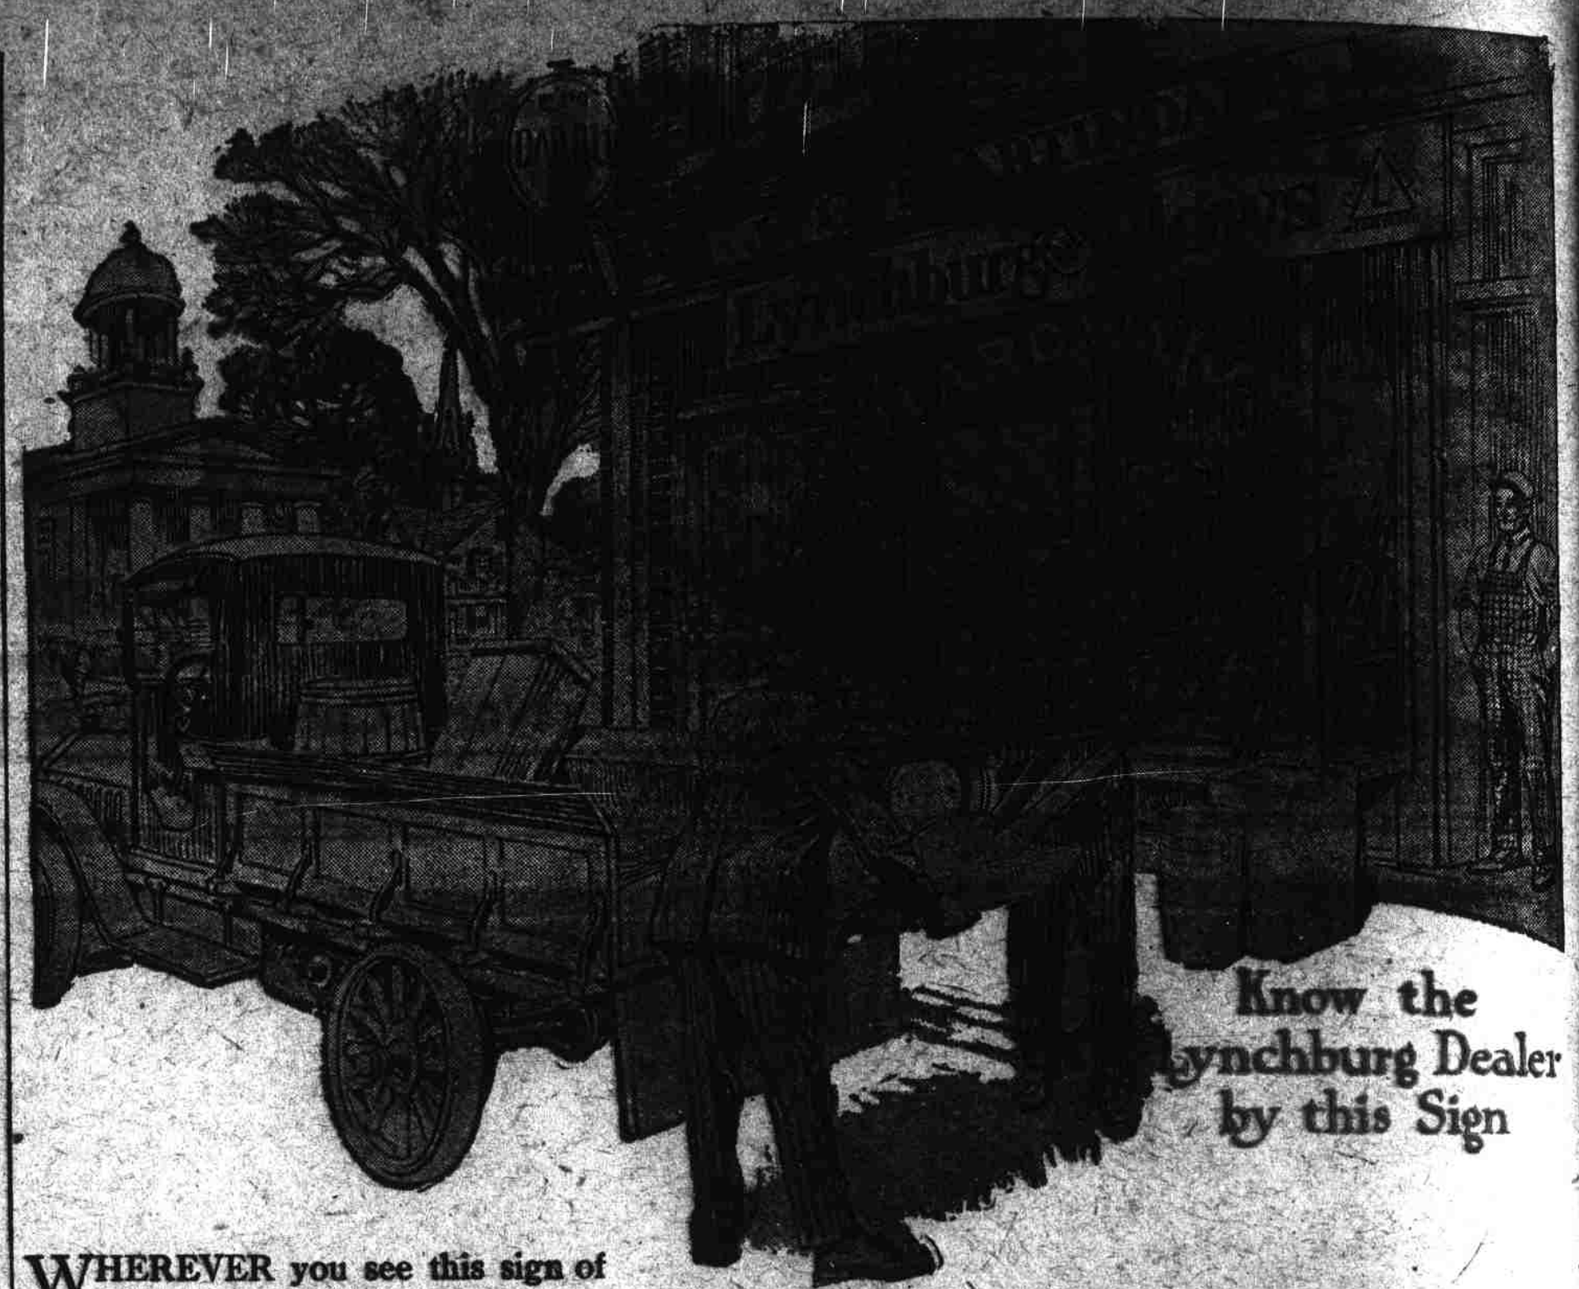
Pat. in Canada Apr. 6, 1915

Patented Hook Attachment

Look for the wire staple with felt washer. It firmly grips hook to pad even though cover is weakened by sweat and long usage. This lengthens life of pad. It is the greatest improvement since we invented the hook. If this fastener is not found on any pad you buy, it lacks a most important feature. *Used on all our hook pads and only on pads made by us.*



Know the Lynchburg Dealer by this Sign

WHEREVER you see this sign of Lynchburg Chilled Plows displayed, you will find a merchant who desires to give his customers what he knows to be the best in all things.

For light running and constant service, Lynchburg Chilled Plows are not surpassed. Better castings, better bolt-holes, the most rigid daily tests and inspection, combine to make Lynchburg Chilled Plows *the best that money can buy.* There are styles and sizes for all purposes.

Moldboard braced Direct to Standard

Lynchburg Concave Self-Sharpening Plow-Point

WITH the moldboard braced direct to the standard, Lynchburg Chilled Plows are the *most rigid on the market.* The landside handle is attached to the standard with two bolts and the moldboard handle is attached to a malleable handle part already fitted at the factory which makes it much easier to assemble than the old way of fastening handle and at the same time lessens the chance of moldboard breakage. Lynchburg moldboards are made by a special process, in which the chilled metal is annealed to reduce brittleness. The soft gray iron back adds to strength. The sloping landside cuts a clean furrow.
