The Herald Job Office

Is now completely fitted up with the finest assortment of Job TYPE to be found in the State. Every species of Job work can now be speedily, and handsomely printed at this office from a book down to a visiting card. Handbills, circulars, blanks, &c, &c, neatly and promptly printed at short notice, and on reasonable terms.

Especial attention will be given to the Job department hereafter, and we feel assured that all work entrusted to our Job hand, who is experienced in the business, will be executed satisfactorily in every respect. Give him a trial at any rate, and if it is *not* done well, no complaint will be made of a withdrawal of patronage.

POISON—ITS ANTIDOTE.—Farm, stock raising and class-making have been my employment. I now say to our readers something which I think will be useful for them to know. The subject is, I will introduce is poison and its sovereign remedy.

It is now twenty years since I learned that sweet oil would cure the bite of a rattlesnake, not knowing that it would cure any other poison. Practice, observation and experience have taught me that it will cure poison of any kind both in man and beast. I think no farmer should be without a bottle of it in his house. The patient must take a spoonful internally and bathe the wound for a cure. To cure a horse it requires at times as much as it does a man. Here let me say of one of the most extreme cases of snake bite in this neighborhood, eleven years ago this summer, where the case had been over thirty hours standing, and the patient given up to die by the doctors. I heard of it, carried the oil and gave him one spoonful which created a cure. It is an antidote for arsenic and strychnine. It will cure blood in cattle, caused by eating too freely of fresh clover; it will cure the sting of bees, spiders, or any insects; and it will also cure persons who have been poisoned by a low running vine growing in meadows, called ivy.

EXTRAORDINARY RELATION BY MARRIAGE.—Not long since a man in Sauk County, Wis., married for his second wife his own stepmother, singular enough, was a sister to his first wife. The lady is, therefore, not only stepmother and aunt to her husband's children, but also their grandmother, while the husband is step-father to his step-sister. Her issue by his marriage will not only be own cousins to their step-brother, but uncles and aunts also; and the lady herself, being grandmother to her children and nephews, may be regarded as mother to herself and child to herself, and, therefore, her own grandmother.

A distinguished physician, who died some years since in Paris, declared. "I believe that, during the twenty-six years I have practiced my profession in this city, twenty thousand children have been carried to the cemeteries, a sacrifice to the absurd custom of exposing their arms naked."

I have often thought that if a mother were anxious to show the soft, white skin of her baby, and would cut a round hole in the little thing's dress, just over the heart, and then carry it about for observation by the company, it would do very little harm. But, to expose the baby's arms, members so far removed from the heart, and with such feeble circulation at best, is a most pernicious practice.

Put the bulb of a thermometer in a baby's mouth the mercury rises to 99 degrees. Now carry the same bulb to its little hand; if the arms be bare and the evening cool, the mercury will sink 20 degrees. Of course all the blood which flows through these arms and hands must fall from 20 to 40 degrees below the temperature of the heart. Need I say that when these cold currents of blood flow back into the chest, the child's general vitality must be more or less compromised? And need I add that we ought not to be surprised at its frequently recurring affections of the lungs, throat and stomach?

I have seen more than one child with habitual cough and hoarseness, or choking with mucus, entirely and permanently relieved by simply keeping its arms and hands warm. Every observing and progressive physician has daily opportunities to witness the same simple cure.

DOVE'S OPTICAL STUDIES.—Prof. Dove describes a method of producing lustre without stereoscopic combinations. A pattern cut out of red paper is pasted on a sheet of green paper, or the reverse arrangement may be adopted. If a plate of red glass is held before one eye and a plate of green before the other, the picture is seen brilliant and lustrous, as though painted on glass porcelain. A blue figure on a red field, or the reverse, when viewed through red and blue glasses, give similar results.

INTERESTING APPLICATION OF THE STEREOSCOPE.—When two pages, printed from the same type, are combined in the stereoscope, the printing appears to be in the same plane. In the most careful attempt of the printer to set up a page or a few lines alike, the words and the letters will, in the stereoscope, be sure to be in different planes. By this means, when genuine and counterfeit bank notes are combined in the stereoscope, the difference is at once detected.

MANUFACTURING.—England and Wales have over 3,000 factories; and they pay the operatives $11,000,000 per annum; their entire trade in the various fabrics amounts to $525,600,000 annually, giving employment to 1,000,000 operatives.

CURE FOR BURNS.—The *Gazette Medicale*, France says that, by an accident, charcoal has been discovered to be a cure for burns. By laying a piece of charcoal upon a burn, the pain subsides immediately. By leaving the charcoal on one hour, the wound is healed, as has been demonstrated on several occasions. The remedy is cheap and simple, and certainly deserves a trial.

"HE'S VERY SORRY NOW."—There is a ship from Portsmouth, N. H., now in the harbor of Mobile. At the time of the presidential election she was in the harbor of Portsmouth.—Her owner was a rabid Lincolnite and tried to prevail upon her captain, who wished to vote the Bell ticket, to vote for Lincoln. The sturdy skipper would not do it. The other day, since his arrival in this port, he received a letter from the Portsmouth owner in which occurs the expression, "I would give ten thousand dollars, now if I hadn't voted for Lincoln!" He's very sorry now, but it's too late.—*Mobile News.*

Col. JOHN C. FREMONT, the celebrated explorer, and the candidate for the presidency of the republican party in 1856, arrived in the city yesterday morning by the Ariel. Mr. FREMONT, we understand, comes to the city on business connected with his Mariposa claim and mining company. Their rights are now fully recognized by all the tenants, and the community is as orderly and prosperous a one as any in California. The company itself is also doing a very large and profitable business.—*N. Y Nor'ld.*

The Boston *Transcript* says: "The Hoosack tunnel shaft is now 225 feet deep, and 100 feet remain to be excavated. Visitors sometimes go down in the huge swaying bucket, but they seldom wish to repeat the exploring expedition.

GRAND VIRGINIA DISCOVERY.

Some four months since our excellent townsman, NAPHTALI EZEKIEL, informed us that he had prepared a hair restorer, with which he was experimenting upon his own head, whose top was entirely bald. We saw him two days since, and on the place so bald four months since, a fine crop of hair has sprung up with a vigorous growth. So convinced is Mr. Ezekiel of the efficacy of his discovery, that he has named it "THE INFALLIBLE VIRGINIA HAIR RESTORER." Mr. E. is about going into an extensive manufacture of an article which is destined to prove of anxious interest to our bald pated friends.—*Richmond Enquirer, Dec. 12, 1850.*

This famous article can now be had of the principal Druggists. Those persons who desire a fine head of hair, have only to use the restorer according to printed directions on the bottle. Those who have any doubts of its efficacy can have them removed in a short time, by using the Virginia Hair Restorer Infallible, proving that it is all it is claimed to be.

A QUESTION FOR MATHEMATICIANS AND ECONOMISTS.

IF 1000 feet of gas is consumed through eight burners, in 9 nights, at a cost of $5 per thousand feet, how much is consumed by each burner per hour? at what cost, and what would be the cost of an equal amount of light obtained from Kerosene Oil? Answer: There is consumed by each burner, 25 feet per night, or 6 feet per hour, at a cost of 6 cents per hour per burner. Four Kerosene Lamps afford as much light as 8 gas burners; 4 gallons of Kerosene Oil will supply 4 lamps one month, which, at $1,20 per gallon, is $4,80 per month, or a cost of one cent per hour per lamp; therefore, by burning gas, the expense is only six hundred per centum greater than to burn Kerosene Oil, which, with Lamps, can be had at the RENDEZVOUS of the Inimitable
