What You Buy With **WAR BONDS**

The 155-millimeter gun is the modern version of the old "GPF" of World War I days. It has a range fifty percent greater than the old gun, heaving a 95-pound projectile approximately 15 miles. It is capable of high road speed and each one costs $50,000.

Arsenals of America are working at terrific speed turning out this long range, effective weapon for our armed forces. You and your neighbor working hand-in-hand in unity can make possible the purchase of an adequate number of these guns by buying War Bonds. Put 10 percent of your income in War Bonds to help reach your county quota, every pay day.

ROBINSON DAIRY INSTALLS PASTEURIZATION PLANT

Mr. Grover Robinson, of Boonford, N. C. has had milk pasteurization equipment installed at his plant. This is the first Pasteurizer to be located in this section. With this equipment the Grade A Raw milk, which he has formerly been producing and selling, will be heated to a temperature of 143 degrees Farenheit and held at this temperature for thirty minutes.

The time and temperature of pasteurization are designed to be sufficient to kill any harmful micro-organisms with the least possible effect upon the milk itself. It does not alter the taste, appearance or digestibility of milk. Pasteurized milk implies precaution, protection, and prevention. Next to water purification, pasteurization is the most important single preventitive measure in the field of sanitation. The people of Yancey County may well consider this a boost to their milk industry. —(T. G. Ellis, Sanitarian, District Health Department.)

PLEDGE CAMPAIGN FOR WAR BONDS

URGES PURCHASE

Every state, every county and every citizen is urged to purchase war bonds and stamps in a nation wide pledge campaign now under way.

All wage earners are asked to pledge at least 10 percent of every pay check so that the saving may be systematic. This plan, also, will encourage the use of current income for this purpose rather than the investment of principal already saved up.

Henry Morgenthau, Jr., Secretary of the Treasury, under whose auspices the pledge is being made, has stated that this is no "token" campaign and that the vast citizen army is expected to make a real investment in America. Up to "the very limit that each person can afford without actually taking food and other necessities from himself and family," the Secretary said.

Far Reaching

The pledge campaign is probably the most far reaching and wide-spread attempt to reach the people of North Carolina ever attempted. Iit is the objective of the Treasury Department to pledge every one in the gigantic task to raise the necessary money to meet America's war costs.

In this connection Secretary Morgenthau stated that he has no goal in dollars in this campaign.

"I have been much more interested in reaching vast numbers of individuals and in absorbing current income rather than accumulated savings in the banks," Secretary Morgenthau declared, adding, "In this campaign there is no exemption for any group or any person. We must follow through not only in terms of a few million individuals or two or three billions of dollars, but by a determined effort to reach every individual in this country."

Exceed Quota For May

The quota for this county for May was $4800 and this was exceeded. The next quota has not been released yet but will probably be an increase.
