Handicap Week Be Observed Oct. 5-11

National Employ the Physically Handicapped Week is being observed throughout the nation October 5-11, 1952. This program is in accordance with a law passed by Congress in 1945. The President's Committee met on September 4, at a President's Luncheon in Washington, at which time President Truman gave a "kick-off" for the week with his proclamation and a citation for the most outstanding handicapped individual in the nation. Working with the President's Committee is the Governor's Committee of all the states. On October 3rd, Governor Scott will present a citation to the most outstanding handicapped person of North Carolina. With the National and State Committees, we have the various community committees, who are selected in this area by the Employment Security Commission of North Carolina, one of the participating agencies.

Mrs. Corie B. White, Manager of the local Employment Security Commission office in Edenton, which office services Perquimans County each Thursday 9:00 - 11:00 A. M., at the Court House in Hertford, announces that the services of Howard Pitt, Clerk of Court, have been secured to act as Chairman of National Employ the Physically Handicapped Week for Perquimans County.

Mr. Pitt will assist the Employment Security Commission in finding the handicapped applicants in Perquimans County who are in need of gainful employment, and to direct both applicants and employers interested in workers to the Employment Service Representative servicing Perquimans County.

It is the responsibility of every citizen in this community to help the handicapped overcome his handicap by being placed in a job that he or she can do. America is great, not because of her natural resources and rich land, but because of her people.

Some 7 million men and women with physical disabilities are contributing their part, and yet 2 million more are ready, willing and able, with proper vocational training, medical services, and necessary rehabilitation services to help build a stronger nation and to find their place among the labor force. The handicapped must live and eat 52 weeks of the year. They are a part and parcel of our American economy. Realizing this, states and communities must provide a program of information, education an dpromotion aimed at selective job placement of qualified handicapped workers not just this one week, but throughout very week of the year.

Mr. Pitt and the staff of the Employment Security Commission request your assistance in this program that is being launched throughout the nation as a reminder, that we are to help the less fortunate around us to a better way of life through employability. It is the individual's ability rather than disability that counts. Hire the handicapped—it's good business. Their job performance has proven outstanding. It lightens the load on the taxpayer, business, industry and community and heightens citizen morale to become independent through work security.
