

## DEPARTMENTAL NEWS

### Time Department

Our fisherman, Mr. Zu Zu Hadley, says he broke all previous records one day last week. One Pike (better known as Jack) and two nice Bass was the result of his trip up Finger Fork Creek. He says one Bass weighed three pounds and the other two pounds, but failed to weigh the Pike, as the scales on his back were not large enough.

Judging from the display of wrist-watches in the payroll department, one would say that the strike has not seriously affected the jewelry stores in Albemarle.

Mr. B. N. Moose, of the Distribution Department, spent Wednesday night, the seventeenth, in Winston-Salem, N. C. He reports the D. O. K. K's had "some time."

Miss Johnnie Ferree, of the Distribution Department, is filling the place as teacher for the Second Grade until a teacher can be secured.

Mr. J. Arthur Wainwright, night timekeeper in the Carbon Plant, is spending his vacation at his home in Morganton, N. C.

Mr. J. W. Tilley, Chief Clerk of the payroll department, is spending his vacation "Somewhere" in North Carolina.

Miss Mary Lou Caldwell is able to be at work again, after being quite sick for several days.

### Works Office Notes

Yes, they're playing checkers again on the second floor. We hear a long-drawn-out sigh of relief from Mr. Pannill and his force, who have just taken possession of the old Cost Office, where Mr. Wharton and his accountants could be heard cussing almost daily over the stock record cards. "Yeh, it's a great life." The stock record experts, with the exception of Miss McGee and Mr. Wharton, have moved to the Storeroom office, where they can keep in closer touch with the M. U. stuff. Mr. Wharton and Miss McGee are now occupying the office in which Mr. Pannill and his "Big Four" were penned in. Everybody seems to be satisfied all around, however, and I don't think the Carbon Plant will have to

worry any more about their carbons multiplying while they are in the process of baking.

Mr. Rees is spending his vacation in his old home—Badin. He was so attached to the burg that he just couldn't go away from it. Mr. Rees was one of the prominent conductors of the big minstrel which the D. O. K. K's pulled off. The minstrel proved to be one of the best ever shown in Badin.

HAS SOMEONE JUST MADE A REMARK ABOUT MR. STOKES' FORD CAR, OR THE CONSTRUCTION TEAM?

Mrs. J. H. Cowles, of the Mailing Room, has severed connections with the Company, and will start housekeeping at once.

Miss Gladys Mason, of the Purchasing Department, is spending her vacation with relatives at Starr and Eagle Springs, N. C.

Mrs. H. A. Lilly is spending her vacation with her parents at Greensboro.

Mr. T. R. Huggins is spending a week at his home in Marion, N. C.

### Carbon Plant Items

Furnace No. 1 is now down, undergoing repairs. The following masons have arrived recently to be used on this

work: Messrs. J. D. Black, Foreman, H. L. Jones, Thos. Adams, B. F. Moore, S. J. Shaffer, W. B. Davidson, H. L. Cecil, and J. L. Cecil. Mr. Jones, Mr. Moore, and Mr. J. L. Cecil are old men, who were here during the construction of the present furnaces.

Mr. Andy Beck, formerly employed in the mechanical department of the Carbon Plant, is now employed in the Boiler Room as fireman. Messrs. Jessup and Henly are firemen on the other two shifts.

Biddix is rapidly getting his menagerie together up on the Hill. Up to date he has four bird dogs, one hound, seven opossums, and one dog whose nationality can't be established.

Mr. G. R. Swaney, formerly superintendent of the Maryville Carbon Plant, and at present connected with the Mas-sena Plant, was a recent visitor.

The Baking Department, Gas Producer and Boilers are now being operated on eight-hour shifts, to the satisfaction of all concerned.

Mr. D. G. Graham is back on his old job again, after spending several months in the Grinding Room.

Messrs. J. S. Hargett and A. H. Eagle are now employed in the Baking Department.

### Electrical Department Sparks

We have noticed in THE BULLETIN recently some very interesting information regarding the water wheel test made at the Yadkin Narrows and Falls power houses. It was interesting for several reasons, for it explained how it was done, and by whom. Now some of the operators seem to think we have had one or two generator tests in Yadkin Narrows power house recently, and that the generators showed up just as good as the water wheels; at which time the operators on shift and the gasoline engine was also tested. However, there was nothing serious happened, as the current was off again and on again within a few minutes, going in the right direction.

Fred Rodgers has just returned from two weeks' vacation spent visiting in and around Fort Mill, S. C. Fred says they killed the fatted calf, and for once he forgot there was such a thing as the H. C. L. Which reminds us of Lewis
