This plant never shuts down, hence permanent employment is insured for all, under clean living conditions, as there are two immense wash-houses, with individual wash basins and steel lockers, free to all employees. Almost every kind of labor is employed, and every man has an equal chance. Tho he start at the bottom he may rise to the top, his limit being only his own ability to make good.

In our Construction Department, we need carpenters, steel workers, and a number of laborers.
