Safety First Organization

Since the last issue of THE BULLETIN, we have completed the Safety First Organization at the Badin plant, and in this issue we give the entire personnel of our Safety First Organization, showing the various departments and the names of the members serving on each committee.

Let us make 1920 a banner year. During the next twelve months, let us not have one serious accident. We can do it if every man will try. Seek out a member of your Safety Committee for information and advice, and, if you have any suggestions to make, they will be more than pleased to receive them. Assist your Committee by always being careful; remember there may be others working around or near you, and do nothing that would endanger their safety. Report at once all unsafe or defective tools and appliances; assist in keeping the aisles and passageways clear and free from obstructions; do your share towards keeping your department clean; and be ready and willing at all times to assist, caution, or advise the new men.

We should all remember that "Safety First" is simply a question of saving human life—the most valuable thing in the world, which when once gone can never be brought back. It is trying to save men from losing their legs and

their arms, which can never be put back. It is trying to save the making of widows and orphans, destitution and misery. Neither the officers of the industry nor the laws can do it; but the workmen can do it if they try. And if we will all work in harmony we will not only save life and limb, bring greater content and happiness to our wives and children, but we ourselves will reap the benefit of our efforts by having a cleaner, better, safer place in which to work.

It is a man's job we have undertaken; but if we go at it enthusiastically, if every man will put his shoulder to the wheel, and will think, act, and practice *safety*, we will accomplish the result desired.

Aluminum Plant

Committee No. 1—Jack West, A. L. Culveyhouse, Luther Price, R. C. Fryer, George Fife, Norman Hardin, S. C. Hambley, Sandy Welch, R. Leatherwood, W. M. Brookbank, H. Standridge.

Committee No. 2—A. G. Tate, B. D. Mauldin, L. P. Garland, Andy Hall, Reuben McCosh, L. H. Stepp, H. S. Cranford, Walter Ellis.

Committee No. 3—F. L. Greenlee, I. T. Fisher, G. C. Brown, Monroe Evans, Boyd Martin, George Ward, T. J. Johnson, James Council, Virgil Howard.

Committee No. 4—H. C. Jenkins, R. B. Lienster, John McGregor, F. M. Hernon, W. D. Kitchen.

Carbon Plant

Committee No. 1—C. E. Spence, G. Edwards, W. G. Mabry, J. Wilcox, A. D. Hill, O. Chrisco, S. Blaylock, Dees, J. S. Hargett.

Committee No. 2—G. L. Johnson, C. Daniels, William Steen, J. C. Miller, E. Lamb, B. A. Williams.

Machine Shop

Committee—E. N. Evans, M. S. Dale, T. L. Chambers.

Construction

Committee—W. I. Stokes, N. L. F. O. Culp, J. F. Kiley.

Planing Mill—Store Room—Recl

Committee—Joe Sills, J. A. O'Connell, C. H. Myers.

Electrical Department

Rotary Stations Committee—H. O. Rhea, L. W. Gabriel, E. M. Talbot.

Motor Repair Shop Committee—Rockfield, L. E. Wilson, J. K. O'Donnell.

Miscellaneous Outside Work Committee—B. L. Gomo, C. E. Graham, McElhaney.

Infections

Too much stress cannot be placed on the importance of all men immediately reporting to the First Aid to have wounds properly dressed. Regard no wound, however slight or insignificant your
