

THIS YOUNG MAN, WHO BEARS A STRIKING RESEMBLANCE TO CLAUDE MASK, SHOWS HOW BADINITES ARE ADDICTED TO THE BOTTLE

Rotary Station

Mr. W. A. Hardin paid his semi-annual visit to South Carolina during Christmas. Wonder why "Dick" doesn't bring her to Badin, and save railroad fare?

Mr. B. H. Griffin went home for Christmas, and "to join the Masons." "Grif" was a few days late getting back, but he is almost able to walk now.

Mr. J. A. Fagg is off nursing a bad cold. "Tuff luck." in a desert like Badin?

Mr. Charles Avant just returned from a business trip to South Carolina.

Mr. F. L. Roth is over at Rotary Station No. 25 now, seeing that the meters properly mete.

Mr. W. L. McCall spent the holidays with home folks.

Narrows Power House

On Saturday, December 27, Mr. and Mrs. Earl Belk arrived in Badin, from Seattle, Wash. They have made Seattle their home for the past five months. Now they are with us again, and Mr. Belk has his position back at the Narrows. Mr. Belk looks quite natural in

the generating station. We extend Mr. and Mrs. Belk a welcome hand, and are very glad indeed to have them with us. We sincerely wish for them the best.

If you want to get some real dope on what the unions and I. W. W. stand and hold for, just have a talk with Mr. Belk, who has seen some of the trouble given by such organizations as above mentioned. He says that the Unions and I. W. W.'s have demoralized almost the entire western part of our country. To give it plain, he says, to h—ll with such organizations.

At last we have filtered water in the power-house. Instead of the janitor going a mile or two for drinking water, he draws the water from a spigot conveniently placed in the wash- and dressing-room. We are exceedingly grateful to the person who promoted the idea of having filtered water run to the power-house.

The installation of the new D. C. Generator on No. 1 A. C. Generator shaft extension having been completed and tested out, we are now able to operate all our auxiliary D. C. motors from this machine, which means a great improvement over the old way.

The old lake has risen to its normal height—179 feet headwater, and still on the climb.

It has been said, and it seems to be a true saying, that if anyone ever stops in Badin long enough to get a whiff of the pot-room fumes or a drink of Badin filtered water there is no staying away from the place.

The changes in the wiring are progressing nicely, and in a few days we hope to have the entire station under the new control system. This wiring is being pushed as rapidly as possible.

Heartiest congratulations to Mr. and Mrs. R. E. Jones, and best wishes. We wish them the best that life affords.

Now, you single men, get ready and go to it. Jones started the wheel, why not keep it turning? Mr. Gonyea would be glad to have all married men. Don't wait.

Two new men that we have with us now are F. T. Gamble, of Fort Mill
