January Accident Record

The following is a record of the lost-time accidents which occurred in the plant during the month of January, and it will be noted that every department shows a very material decrease over the December record. Go to it, Boys; let every succeeding month show a like decrease, and your record will be one of which you may well feel proud.

	Lost Time Accidents	Days Lost
<i>Aluminum Plant</i>		
Potroom No. 24	0	0
Potroom No. 26	2	36
Potroom No. 28	0	0
Potroom No. 32	1	3
Potroom No. 34	0	0
Potroom No. 36	0	0
Rodding Department	1	1
Pot Lining Department	1	2
Metal Loading	0	0
Re-Melting Department	0	0
Unloading Ore	0	0
Cleaning and Sweeping	0	0
<i>Carbon Plant</i>		
R. E. Lee	1	6
A. D. Howell	0	0
G. E. Biddix	0	0
W. R. Young	0	0
<i>Electrical Department</i>		
Rotary Stations	0	0
Power Houses	0	0
Motor Repair	0	0
Miscellaneous Electrical	0	0
<i>Machine Shop</i>		
E. N. Evans	0	0
M. S. Ragsdale	0	0
T. L. Chambers	0	0
<i>Construction Department</i>		
Store Room	1	6
Reclamation	0	0
Planing Mill	0	0
Townsite	0	0
Total of entire plant..	7	54
Total in December	21	116

Do not think of your faults; still less of others' faults.

Have You Yours?

Have you received your copy of the Safety First Rules and Regulations? If not, ask a member of your Safety Committee for a copy.

These are in pamphlet form, of convenient size, and every man should keep a copy in his pocket. Read it over carefully; study and analyze each rule, and if possible memorize them. Remember these rules were decided upon and adopted by the members of your Safety Committee—men who work beside you in the plant—for your safety and the safety of others, and these men will insist upon these rules being obeyed.

You potroom boys who have a bad habit of propping open the potroom ventilators will some day be asked by a member of your Safety Committee, "Boy, what is rule No. 11 of your Safety Regulations?" The same applies to you boys in the Machine Shop, Carbon Plant, and Electrical Department. Memorize these rules and regulations; they are simple, and pertain to all our work, and if you will constantly keep them in mind you will reduce the accidents in your departments to a minimum.

Safety Spirit

The success achieved by any Safety Organization in accident prevention depends largely upon the attitude of the men throughout the plant; their ability and willingness to grasp the new spirit and, by whole hearted co-operation, carry out the ideas of safety work. What a new man thinks of his plant safety organization is usually the impression left him by his foreman and fellow-workers. The workmen usually express its spirit and policy, just as the soldier expresses the morale of the army. If you go about your work in a careless, don't-care way, it is almost certain to influence others to follow your example, which in time will result in increasing rather than decreasing the accidents in the plant; whereas, if you follow the path of safety, are careful, and insist upon others doing likewise, you set an example that will be willingly followed by others, and

CAPTAIN DAVE

which immediately impresses the new man with the idea of carefulness, so essential to his safety and the safety of others. Successful safety work is possible only where there is a real safety spirit. Let us all help to develop that spirit.

Potroom No. 24

We have noticed several very good records by different departments since the beginning of our Safety Organization, but one well worth mentioning has been made by Potroom No. 24. We not only believe this to be the best record at the Badin Plant, but a record for all plants. All of us that are familiar with potroom work know that starting a room after it has been frozen for some length of time is a very difficult prob-
