

CLOSURE AT WHITNEY

Arthur V. Davis, whose vision was quick to penetrate the future possibilities of this undertaking, and whose unerring judgment and foresight made possible the completion of the work and the realization of a hope long deferred.

The development at the Narrows will remain for all times a monument to which the counties of Stanly and Montgomery, and the State of North Carolina, may point with pride, and an example of what may be accomplished by ability and initiative, controlled by sound business judgment.

The Vegetable Garden

There is still time to sow snap beans, beets, and carrots. Irish potatoes should be planted the early part of the month, although I have made a profitable crop of potatoes planted the middle of August. Later in the month sow kale, mustard, rape, radish, spinach, lettuce, and turnip. The Southern Giant Curled Mustard is a good variety to plant. It forms a great mass of light green leaves, beautifully frilled, and finely curled. One ounce for thirty feet of drill.

Don't fail to try spinach, as stated in last issue.

Long standing Siberian Kale is extremely easy to grow. This is a salad from the cabbage family. Sow in rows— one ounce to one hundred and fifty feet

of drill; or broadcast the same as turnips.

Sow seed of the early Milan Turnip for fall use, and later in the month sow seed of the Purple Top Globe and Yellow Aberdeen Turnip for winter use. The last of the month, seed of the Seven Top Turnip can be sown in rows or broadcast, to make greens for winter and spring use.

The early dwarf Garden Peas can be sown in this month. Sow in deep furrows, and cover lightly; then work the soil to them as they grow so that you can get the roots deep in the soil, enabling them to stand the heat and droughts. They will usually give a good crop in the early fall, and will be generally more free from mildew than when sown earlier.

It will be well to spray with Bordeaux Mixture to ward off mildew.

Keep a sharp outlook for insects of all kinds, for the hot weather season brings many kinds into activity.

Don't fail to spray your potato and young tomato crop with Bordeaux Mixture or some other made-up fungicides.

The last of the month is the time to plant strawberries, as they will get a small picking next season. A strawberry bed should be only allowed to bear two seasons, as the beds get choked with grass and clover, and we get better fruit by renewing the beds yearly.

Bordeaux Mixture Spray Formula for Fungicides

Copper sulphate (bluestone), 1 lb.
Stone Lime, 1½ lbs.
Water, 12 gallons.

Dissolve the bluestone in a small quantity of hot water, in an earthen or wooden vessel; then dilute to six gallons. Slake the lime in a wooden vessel, and then dilute to six gallons. The two solutions are then poured into a wooden vessel or barrel, care being taken to pour the two together slowly, and stir thoroughly at the same time. If you wish to make an insecticide with the above formula, add one and one-half ounces of Paris green; then you have an insecticide and fungicide to combat the insects and fungus.

Relief Department

Below follows a statement of the Relief Department for the month of June:

Number cases of sickness	28
Number cases of accidents	8
Number deaths	1
Number days lost due to sickness.....	544
Number days lost due to accidents.....	107
Amount paid for sickness	\$ 382.18
Amount paid for accidents.....	75.97
Amount paid for death benefits.....	100.00
Balance on hand, June 1.....	\$2,383.88
Amount received from members.....	346.50
Amount received from Company.....	346.50

...Total Balance and Receipts...\$3,076.88
Total expended during month.... 558.15

Balance on Hand, June 30.....\$2,518.73

Relief Agent

Mrs. Littleton Improving

Mrs. Maggie R. Littleton, who for several years has had charge of the Badin Club, has been compelled to give up that work on account of illness, and to go to a sanatorium for treatment. Reports coming to her friends in Badin are mainly of a hopeful nature, though physicians do not offer much encouragement as to permanent improvement.

THE BULLETIN takes this occasion to express sincere sympathy for Mrs. Littleton, and in doing so feels that it is spokesman for a large circle of friends and acquaintances who hope that she may yet have many years of health and activity.

Mrs. W. G. Dotson has been placed in charge of the Club, and is filling this position with grace and ability.
