

## BADIN BULLETIN

## Next to Hnman Beings

*(Continued from page 3)*

decay, will become young again when you, the doctor, have cut and healed his rotting sores. The trees pay back a thousandfold. A little planting done by your community around on the waste places may make a forest that will pay off the municipal debt when the time for refunding comes. But let us not talk in those terms. The trees will pay in love, in beauty, in magic of response to care. They call to the childless. They offer to bless through long years and ages those who adopt them and tend them.

—Collier's.

## Canning Station Results.

The season just closing at the canning station has been far more than usually successful. A larger number of people than ever before have made use of the station, thus improving their methods of canning and insuring that their products will keep unspoiled for winter use.

It may interest the ladies to know that they put up of fruits and vegetables in tins 638 pints (No. 2 cans) and 3,594 quarts, and in glass jars 330 quarts. These figures are not complete for the season which has several days still to go. But it is plain that old H. C. L. has been hit hard in Badin!

It is a pleasure to testify to the excellent work of Miss Monroe, canning demonstrator, and also to mention Mrs. Kerns, who has been canning since Miss Monroe left us in order to take up her school work.

## Awards for Yards and Gardens

The prizes are awarded for the season on the basis of variety, growth, cultivation, and season's crop.

## White Townsite.

## Vegetables—

1. Russel Leatherwood, 14 Chestnut Street.
2. W. C. Morton, 5 Ash Street.
3. P. L. Book, 86 Nantahala Avenue.

## Flowers and Yards—

1. P. L. Book, 86 Nantahala Avenue.
2. H. M. York, 29 Willow Street.
3. Mrs. Burdette, 124 Walnut Street.

## Honorable Mention—

- J. W. Reed, Kirk Place, Vegetables and Flowers.  
Mrs. John Smith, Kirk Place, Vegetables and Flowers.

Paul Fritz, 17 Magnolia Street, Potted Plants and Flowers.

C. P. McSwain, 191 Spruce Street, Potted Plants and Flowers.

Captain Kidd, Spruce Street, Flower Garden.

Victor Foglia, Ash Street, Vegetable Garden.

## Colored Townsite.

## Vegetables—

1. Dan Pierce, 905 Sherman Road.
2. Jas. Hathcock, 422 Jackson Street.
3. Trice Parker, 709 Sherman Road.

## Flowers—

1. Dan Pierce, 905 Sherman Road.
2. Greely Forest, 899 Sherman Road.
3. Miss L. E. Marable, 901 Sherman Road.

## September Planting

Sow winter Radish, Spinach, Turnip, Mustard and Kale.

Sow seed of the early Jersey Wakefield Cabbage after the middle of the month, to make plants for setting in the open furrows in November. These are what we call "frostproof" plants.

About the middle of September plant seeds of the Yellow Potato Onion; these will ripen about June. Plant at the same time sets of the Norfolk Queen and Pearl, for green onions for next spring.

The Norfolk Curled Kale can be sowed in rows or broadcast, for winter and spring cutting, as can the Seven Top Turnip.

Give the Irish potatoes rapid and shallow cultivation. They need a dust blanket on the surface to conserve the moisture. Do not disturb the Sweet Potato vines. Some people think it well to pull them loose from the ground; but this does more harm than good.

Early in the month, any of the flat turnips can be sown.

Lettuce plants from seed sowed in August should now be set for heading. What is needed is a bed heavily manured, and then, after the plants start, some nitrate of soda as a side-dressing, to push them along—for lettuce to be good must be grown fast. The middle of the month, sow seed of the Big Boston Lettuce to be set out the following month.
