for vetch is 20 to 25 pounds to the acre.

Early in the month, prepare land that is to be sown in alfalfa by putting on lime and fertilizer as needed. Sow the seed during the latter part of the month, preferably the last week of August.

The variety of alfalfa best adapted to North Carotina is the Kansas common. It should be seeded at the rate of 25 pounds to the acre. Most land requires 'three tons of lime per acre, 600 pounds of muriate of potash.

Early planted soybeans will be ready to cut for hay in August, Blair continued. Many farmers wait three to six weeks too late to cut their soybeans.

The best hay is secured when the beans are cut while the pods are small, and before any beans have formed in the pods. Some authorities recommend that the plant be cut while in bloom.

when it blooms, which usually occurs from the middle to the latter part of August, depending upon the variety and certain other conditions.

Blooms, which usually occurs plants. Dusting with calcium* arsenate, the same as for boll weeds will control, will keep down these worms.

KEEP UP FIGHT AGAINST INSECTS ON FARM CROPS

GET READY TO SOW FALL
COVER CROPS IN AUGUST

August is the month to start sowing fall cover crops, said E. C. Blair, extension agronomist at State College.

Vetch or crimson clover may be sown in cotton when it has been laid by, or in corn or tobacco which have already been laid by, he said. Scatter the seed and cover it with a cultivator.

Letwise survive the winter.

As soon as beans have been harvested, the plants should be plowed the winter.

As soon as beans have been harvested, the plants should be plowed the place of poisoning.

An old maid returned to her hotel room one evening and received the shock of her life. Three strange men were sitting there play-ing cards. The woman immediately called the hotel manager. "There are three strange men?" echoed the manager. "Why, that's terrible!" "If certainly is," snapped the old maid. "I want you to send some one lever may be sown in cotton when it has been laid by, or in corn or tobacco which have already been laid by, he said. Scatter the seed and cover it with

nate, the same as for boll wes-vil control, will keep down these

orms.
Horn worms are beginning damage tobacco seriously in some sections, Brannon stated. Since to bacco is late this year, it is usual-ly susceptible to attack by hora worms. Dust with arsenate of lead.

PERSONALS

When there are no squares on cotton plants, bool weevils will attack the cotton bolls.

Hence, it will pay farmers to continue dusting for weevil control after the squares are gone, said C. H. Brannon, extension entomologist the manager of a local furniture establishment. He was a member of the local Masonic order.

His wife, the former Adelaide Kinsey, preceded him to the grave in 1918.

Children surviving are Mrs. I. B. Grimes of Richmond, Va., Mrs. William Simons of Catherine Lake, Marvin and Kinsey Murrill of this city, Mrs. W. C. Vaughan of Greensboro, and Mrs. W. F. Parkerson of Baltimore.

Nhence, it will pay farmers to continue dusting for weevil control after the squares are gone, said C. H. Brannon, extension entomologist to stranger had not place of shelter and no funds, Robert Johnson, Franklin advertising manager, sharted him cotton fields, he added, and dusting should be repeated as often as necessary in infested areas. He also pointed out that tobactounder tobacco stalks as soon as followed the plants should be revented to her hotel room one evening and received the plants should be plow-special to attack by hora worms. Dust with arsenate of lead. Rotenone will not control this pest.

STRANGE GRATITUDE

Keene, N. H.—Learning that a stranger had not place of shelter and no funds, Robert Johnson, Franklin advertising manager, sharted him cetton fields, he added, and dusting should be repeated as often of appreciation, the stranger do his cabin with the man. As a loken of appreciation, the stranger do his cabin with the man. As a loken of appreciation, the stranger do his cabin with the man. As a loken of appreciation, the stranger do his cabin with the man. As a loken of appreciation, the stranger had not place of shelter and not place of she
