NEW REFRIGERATORS OFFER COOL INSIDE AND OUTSIDE

Now on display at Highlands Engineering Co., the new 1952 International Harvester refrigerators offer for the first time a soft, cool green, called "Spring-fresh", on the inside, and in such a way that a homemaker can select a model that has just the right amount of color to suit her taste. She can choose between a model with colored meat tray and freezer door, two with colored door panels and breaker strips, two with fully colored interiors, or three with all white interiors.

"Interchangeable colored door plaques, which proved so popular on the 1951 IH refrigerators, have been retained so a housewife can key her refrigerator to her kitchen color scheme," said Mr. McCarty, IH

dealer.

A new color--gold--has been added, giving the homemaker a choice of 11 different colors to accent her kitchen door. A smart gold motif has been carried throughout the inside, too, in the finish of lettering and freezer door, "Pantry-Dor" and butter compartment trim.

"International harvester recently received an award from the Society of Motion Picture Art Directors," said Mr. McCarty. "The award was presented, according to the Society's president, for the application of creative design to the home refrigerator. International Harvester has carried the design of the refrigerator to a point where it is a functional, beautiful accompaniment to the mid-Twentieth Century kitchen."

"The 1952 International Harvester refrigerators are even more striking in their beauty," said Mr. McCarty.

"We feel they will appeal to homemakers as much beauty-wise as they always have performance-wise."

Warner Bros.' "Dallas," the romantic adventure drama, starring Gary Cooper, Ruth Roman and Steve Cochran, opens Saturday at the Galax Theatre.

Filmed in color by Technicolor, the story is set in the Texas of post-Civil War days.
