DR. LEWIS BERNER
TO LECTURE AT MUSEUM

The first lecture in a series of evening lectures will be presented at the Highlands Museum of Natural History tonight, June 30th, at 8:00 p.m.

Dr. Lewis Berner, Professor of Biological Sciences, University of Florida, will give a lecture entitled "The Gold Coast and Nyasaland", which he will illustrate with koda-chromes.

DEAR FRIENDS IN HIGHLANDS,

There are no words to tell you how glad I am to be back among you in the beloved hills of home.

Only one who has brought up in Highlands and deeply loves these mountains can know the great joy of return after years of absence.

To me it is the most beautiful part of the world (and somehow I don't have to visit all other parts of the world to know this is true!)

To return in June - one of the loveliest months of the year - and find still a trace of rhododendron and flame azalea, and the laurel blooming all through the green, green woods as it surely never has
(con't. page 4)

ROTARY OFFICERS INSTALLED

At the regular meeting of the Highlands Rotary Club Tuesday night, June 28th, Mr. L.G. Misener was installed as President by Wilton Cobb, a past president of the Rotary Club. Mr. Cobb presented Mr. Misener the President's pin. Other officers installed were: Bill McCall as treasurer, Bob Hart as secretary and C.C. Potts as vice-president. Tom Harbison presented Mr. C.C. Potts with the past president's pin.

Seventeen visiting Rotarians were present at this meeting.

MUSEUM OF NATURAL HISTORY

The Highlands Museum, founded in 1927, is the mother institution of a corporation that now controls the Biological Laboratory and certain holdings, including Lake Ravenel, on the Highlands Plateau. It is housed in a spacious and substantial stone building in close proximity to the Laboratory, to the lake and to the town.
