TWIN PET DOG FOOD	3 5oz cans 29¢
CAPER 5oz PLASTIC CUPS	100 cups 59¢

NEWS FROM YOUR LOCAL HOSPITAL

Your hospital is in the middle of a very serious dilemma...what to do about expanding the facilities and if this is to be done, how shall the program be financed? There is no question about the NEED - it is here - many times there are more patients than there are legally licensed beds to put them in, but sick and injured patients must be cared for. Soon the DECISION will have to be made. Readers of this item are asked, "What would you do if the responsibility were yours to make the decision?"

It is difficult to realize or believe that less than two years ago Your Hospital occupied the present new building when 19 new beds were made available. It is quite likely that few if any persons interested then imagined or believed that within this short span of time the need for more beds would be a matter of concern. Yet two short years have again presented the men who are charged with the management of the Hospital the same problem they faced at that time. Growth is inexorable and progress is inevitable if institutions are to keep up with the health needs of people in every area of life.

Slightly more than two years ago about 5 patients were cared for each day in Your Hospital while today more than 20 patients received care here daily. Almost every department of Your Hospital has increased in the work that must be done to provide this care...and so there has been a growth in the number of employees. Equipment and supplies have also increased in numbers and amounts. Today Your Hospital is Big Business and yet..the same spirit of compassion and tenderness in the care given sick and injured patients is very evident. This is probably the most important item that

must remain the same, no matter how large or extensive growth is in other areas.

Once again your Hospital reports the need of Professional Registered Nurses. As said many times before, Your Hospital is ambitious to become Accredited by the Joint Commission on the Accreditation of Hospitals and it will not achieve this Goal until and when it can indicate the employment of adequate numbers of Professional Nurses. Any reader of this news item either knowing some person in this category of Hospital workers or possibly being one and interested in coming here to serve should get in touch with the Administrator or Head Nurse as soon as possible.
