## Mime Trio Performing on AC Campus

"Touch"

**Touch**, a professional mime trio based in North Carolina will be completing their workshop/performance visit tonight, with a 7:30 performance in Hardy Alumni Hall.

The trio, made up of Sheila Kerrigan, Jef Lambdin, and Laurie Wolf, prides itself on short comic sketches which present mankind in a way which can be tragically realistic.

The visit included a Mime workshop this afternoon from 4:00-6:00 in the Old Gym, with the evening performance beginning at 7:30. During the workshop, the trio chose about twenty-five persons from the audience who were able to actively participate in several mime routines.

The trio consists of Kerrigan, who aspired to be a dancer until she injured her knee and "fell into a mime class in 1971," according to a press release; Lambdin, whose fascination for

mime has led him into a study of its powers, and Wolf, who at one time wanted to run away and play baseball for the Brooklyn Dodgers. The three have received fine reviews, lauding their ability to communicate their messages through the fine art of mime.

**Touch's** repertoire includes short, simple acts with quick, non-verbal punch lines, to more serious, longer social statements such as their popular "America with a Moustache." Other skits include, "The Automatic Friend," "The Garden," "Sweet Dreams," and an untitled piece where a pregnant lady transfers her pregnancy to the unknowing father.

**Touch** will be an experience which no one will want to miss.

The workshop and performance are being provided by the Student Government Association's Entertainment Committee, chaired by Phil Lassiter.

### Power: How?

## HYDROPOWER: Friend or Foe?

by Joel Brame

"...It has been estimated that the global potential of hydropower is equivalent to all energy derived from fossil fuels today (Oliver S. Owen, *NATURAL RESOURCE CONSERVATION* (Macmillan Publishing Co., Inc. New York, 1975), p. 579)." The price for this unending energy alternative, however, may be just as costly.

The use of water as an energy source dates back to the ancient Roman period. Hydropower has been used extensively in the U.S. during the nineteenth century for grinding wheat and corn, sawing logs, and powering textile mills along the New England coast (*NATURAL RESOURCE CONSERVATION*, p. 579).

Hydropower is an attractive source of energy in some respects. It is relatively inexpensive, inflicts minimal environmental abuse, and will never be exhausted during human survival on planet Earth. But there are several drawbacks to this never-ending energy resource.

First, the highest potential for

hydropower exists in many underdeveloped countries. These countries, however, lack many other essential resources, besides not being highly industrialized, and thus the prospect of developing this potential energy source is bleak.

Second, the life expectancy of the massive dams that would need to be built for the development of hydropower have a history of being limited because of the as yet unsolved reservoir sedimentation problems. Several California dams have been filled with silt in less than twenty years, thus ending their usefulness in the production of electricity.

Finally, there are some aesthetic objections to converting some of the world's wild streams into chains of man-made reservoirs. The Colorado River is already closed to future dam projects by congressional mandate (*NATURAL RESOURCE CONSERVATION*, pp. 579-580).

The most recent controversial hydropower dam project has

## Black History Week

Last week saw the continuation of Afro American Awareness's annual Black History Week.

The week was sparked with several events concerning black culture as well as opportunities for both blacks and whites to join together in a little fellowship and fun.

The week was kicked off with a talent show on Monday, and then a movie on Tuesday. The movie, **Which Way is Up**, was shown, and stars Richard Pryor.

On Wednesday, the campus was visited by Masterpiece Illusions, a hairstyling group based in Washington, D.C., who have mastered the art of cornrow hair designs.

Thursday saw an evening banquet with the main course being Barbeque Spare Ribs, and Saturday featured a choir festival, with the A.C. Gospel Choir, the Revelations, the Eastern District HPHA Choir, and the North Carolina Central University and UNC BSM choirs.

## State Aid Cuts College Costs

by J. Fred Pearce

The following is the second part of a three part series on Financial Aid for Atlantic Christian College students.

Along with all of the Federal Aid which is available to college students, there is also quite a bit of aid made available through the state of North Carolina. For most of this aid, students must be residents of the state of North Carolina. You must live in this state for one full year before you can file legal residency.

### NCLTG

The North Carolina Legislative Tuition Grant is available to all North Carolina residents. The grant is provided by the North Carolina General Assembly, and, last year, totalled more than \$400 per year. All a student needs to do to receive this grant is fill out the proper papers with the Financial Aid Office, claiming state residency.

### N.C. Contract Grants

With an adequate demonstration of need, students can become eligible for North Carolina Contract Grants. This grant is also made available by the N.C. General Assembly, and the amount of aid is determined by the Financial Aid Office, on the basis of need. To be considered for this aid, the

student must fill out all proper Financial Aid forms, including the need analysis.

### NCSIG

Another grant determined on the basis of need is the North Carolina Student Incentive Grant. This grant cannot exceed one-half the cost of tuition, and the absolute maximum value of the grant per person is \$1,500 per year. This grant is administered by College Foundation, Inc., in Raleigh. Information can be obtained from them by writing College Foundation, 1307 Glenwood Ave., Raleigh, N.C. 27605.

Again, students must be able to demonstrate need in order to obtain this grant.

### N.C. Division of Services for the Blind

Those who are legally blind or who may have an illness or eye condition which is progressive and may lead to blindness can qualify for special grants from the North Carolina Division of Services for the Blind. Eligibility is determined by a rehabilitation counselor through a personal interview. More information concerning this type of aid can be received by writing: Visually Handicapped, Deputy

## Nursing Workshop

Ladies, there is a workshop planned just for you. Monday,

### Hurry Up!

Any organization that has not made plans to have their picture in the 1979-1980 yearbook should contact Cindy Sullivan (Wenger Dorm) or Ken Finch (Hackney Hall) immediately!

Feb. 25 is the date, so mark it on your calendar! You do not want to miss it! And exactly what kind of workshop is it? It is entitled "Wanted or Unwanted Pregnancy?" and will be directed by three student nursing majors. In just an hour's time, you will get all kinds of information every woman should know. So, we'll see you on Monday, Feb. 25, at 7:30, in Monday, Feb. 25, in Hines 208!!

## UPCOMING EVENTS
