Committee Off Track

By BEVERLY COOK

Unity is the answer to a fine, well put together organization. Yet this element seems to be lacking in the Freshmen Steering Committee. Even though, the existence of this committee is soon to be terminated, the pattern already set by said committee has doomed the Freshmen class to complete entropy, unless something is done about it soon.

The internal battle between the officers of the Steering Committee for the power and control of the Freshmen class, consequently, embedded in many of the freshmen diversity. This battle brought about a lot of partial opinions and confusion among the freshmen, thus resulting in a split of the class into several directions. This can be clearly seen if you look at the number of candidates running for President, Secretary, and Treasurer. The number of candidates running for these offices, will undoubtedly split the class and give way to mass disorganization.

wrong attitude to take, but knowing it's the wrong attitude and doing something about it are two entirely different things. The time is "NOW" for the Freshmen class to unite. So, Pfeiffer, Jones, and Barge, get together, not as individual dorms, each uniting together against the other, but as three dorms combined as one. Remember unity is the answer to a well-organized establishment.

Hats Off To Union Board

By SANDRA WILSON

Hardy congratulations are in order for the members of the Student Union Board. The weekly Tuesday morning Kaffee Klatsch has been a tremendous success. Many intriguing ideas have been exchanged over the coffee and doughnuts served. Perhaps these refreshments have been an impetus to arouse students to attend, but no matter what the motive, the most important thing is the interaction between students and faculty.

Of course the underlying implications of the Kaffee Klatsch are far more important than the activity that takes place. It represents the beginning of a sound basis of communication between faculty, students, staff, and administration. This communication must not take place not only at the hour designated for the Kaffee Klatsch, but must be maintained at all times. Upon this foundation all great institutions are built. This is the goal that makes the success of the Klatsch an overall success for the college.

Which Shall It Be

A large segment of the Bennett family has expressed deep concern over the infrequent publication of the "Bennett Banner." From this it would seem that this group would like to see the publication on an artistic and continuing basis.

While this would be by no means a miraculous feat, it does have its drawbacks under the present situation. Publishing a school newspaper is a slightly larger job than some seem to realize. It requires dedication, zeal, ingenuity, along with a considerable amount of time. When these things are combined, the result is a first-rate work of art, something of which all can be proud.

This, the first edition of the re-birth of the "Banner" was not by any means an easy task. There were problems with recruiting and retaining staff members until recently when a number of underclassmen (Freshmen) came in to breathe new life into an enterprise that was practically dead.

It is hoped, also, that some other members of the family that have demonstrated the ability to write will get the urge to come forward and do so. There are few rewards so large as seeing one's own writings in print. With the magnitude of programs, activities, and personalities always prevalent at Bennett, there is no reason why the "Bennett Banner" should not be a dynamic, informative, useful tool of the Bennett community. It can be as resourceful or dormant as the students make it. Which shall it be?

Where Lies Answer

By DIMPLES ARMSTRONG ***

Here and there around campus, there is much discontent among the students. It can be detected in every conversation and informal "parlay." What is all the discontentment about -- Almost everything -- ranging from social limitations to inconvenient holidays.

Discontentment usually leads to frustration; frustration to built-up-energy that has to find some type of outlet -- be the outlet desirable or undesirable, it must be found sometime in some form. The question is, When? and How? Right now, there is no way of predicting what is to come since human nature is unpredictable.

Where is the answer? Where will it all end?
