If I Were A Weaver

I'd be on the lookout for anything that keeps my looms from running every possible minute.

A loom that runs is turning cotton or wool into goods that will bring money to the mill to pay wages. Every time a loom stops it reduces just that much the amount of money the mill can earn in a day.

If I were a weaver I'd remember that my looms were money-making machines—that every loom stop means that it is not making money. I'd remember that my mill has only one way of getting the money to pay wages. That is, selling the cloth it makes. And so I would see how much first quality cloth I could make.

First, I'd keep the floor clean around my looms. I would pick up a bobbin off the floor the minute I saw it. Because a bobbin on the floor means dirt in the filling, and dirt in the filling may stop my looms and help cut my pay.

Then I would remember to look carefully at my filling to see if it is too dry or twisted too hard. I would throw out bobbins with defective filling because it might kink. I would also watch out for filling wound too loosely on the bobbin—it might slough off and choke the shuttle eye. That would break the filling and stop the loom. I don't want to stop a money-making machine.

And I would watch the warp carefully. Over-sized yarns may mat behind the drop wires. And if the yarn is brittle, the ends won't separate before they break. I would know that if the drop wires are crowded, they cannot fall far enough to stop the loom when a break happens. If that

happens, the loom keeps on running and makes floats in the cloth. So I would watch the warp carefully all the time as one way to prevent waste of time and material.

Then I would check-up on harness and reeds. I would co-operate with the fixer and get the fixer to cooperate with me. That would save minutes and maybe hours every week. I would want harness that does not chafe because chafing causes warp breaks and loom stops. And I would want reeds made to fit the weave. That would mean better cloth and more of it. If my mill could save money by my care, I would know that I would be helping it to compete for orders. I would know that more orders mean regular work for me.

L. H. C. Club News of Elkin

The Lucy Hanes Chatham Club No. 1 enjoyed a watermelon feast at the Masonic picnic grounds on Thursday evening, July 19th. This was the first water melon feast held this summer and it was thoroughly enjoyed by all present. The hostesses on this occasion were Misses Marguerite Lowery, Maude Hayes, Sallie Smith and Margaret Lyons.

Thursday evening, July 26th, around sixty members and friends motored to Roaring Gap where a delicious picnic supper was served. Swimming and boating furnished entertainment for those present. The invited guests included the baseball team. The hostesses were Misses Ina Madison, Madeline Carter, Myrtle Young, Jessie Smith and Fannie Henderson.

The Lucy Hanes Chatham Club No. 2 met at the home of Mrs. Beatrice Willard, in East Elkin on Thursday afternoon, July 19th. This was the first outing held for the club during the six programs which have been planned for the remainder of the summer. An en-

joyable social hour was held by the members following which a delicious ice course was served. The hostesses were Mesdames Beatrice Willard, Rema Day, Hattie Pardue and Stella Baugus.

Reservations have been made for three camping trips to be held this summer. The first one will be on August 4th at Patrick Springs, Va. This is for any member of either club who would like to go. September 1st a group of the L. H. C. No. 1 will go to Shady Shack, near Mouth-of-Wilson, Va. September 15th the L. H. C. Club No. 2 will go to Roaring Gap.

L. H. C. Club of Winston

We are very proud of our two tennis stars, Misses Linda Fishel and Vera Austin. They defeated Hanes Knitting Mill and the Old Dominion Box Company last week. This being the first of a series of games which are being played in the city tennis league.

On Monday evening, July 17th Misses Versa Whitlock and Clara Lawson were joint hostesses at a swimming party at Crystal Lake. 28 members and friends enjoyed the hospitality of these young ladies. After a dip in the pool and several boat rides, ice cream and cantaloupe were served in the picnic shed near the pool.

We are very sorry to report the serious illness of one of our members, Miss Vera Briggs. Vera is a patient at the Baptist Hospital. We all wish her a speedy recovery.

Plans are being perfected for our camping trip which will be held at Shady Shack, near Mouth-of-Wilson, Va., on August 11th. Come on girls, let's make it a hundred per cent.

"A man should never be ashamed to own that he has been in the wrong, which is but saying that he is wiser today than he was yesterday."—Alexander Pope.

Shock And Poisoning

Shock Treatment:

Lay the patient flat upon his back, remove all clothing from the neck, and apply ammonia to the nostrils. If the patient has not fainted but is about to do so (for instance in a crowded building) press the head low between the knees. Let him have as much fresh air as possible. Keep the body warm by the use of hot water bottles and blankets.

Poisoning:

If poison has been swallowed without burning the mouth and throat thrust a finger down the throat and tickle the base of the tongue to cause vomiting. Give a teaspoonful of powdered mustard mixed with water to form a cream. If this does not work quickly, give a teaspoonful of wine of ipecac to a child, or a tablespoonful to an adult. If these are not handy, give a teaspoonful of salt in a glass of lukewarm water. After the first vomiting, give several more cups of warm water and mustard, to make sure that the stomach is well cleansed. If the mouth and throat have been burned do not induce vomiting. If the doctor cannot be obtained quickly, give baking soda, magnesia, chalk, soap or crushed plaster from wall and water. Of course different kinds of acid poisons require different treatments.

In the Dentist's Chair

There is probably no place where the character of a boy or girl revealed quite so quickly and thoroughly as in the dentist chair. If you don't believe it, ask your dentist to tell you about some of his young patients and the trouble he has with them.

If a boy or girl has been "spoiled", if a child is used to having his own way all the time, if he lacks courage, if he is a "cry baby" or whimperer—no matter what the weakness is, it will show up in the dentist's office.

We go to the dentist for the sake of our health. He can save us much pain and trouble, and it is up to us to make his task as easy as possible. Boys and girls who realize this don't cause him annoyance, but the selfish, cowardly, willful youngster makes his work very hard.

How do you act in the dentist's chair? Think it over, for your own sake as well as that of the dentist.—Youth's World.

Smart Aleck: "I can tell you the exact score of the game before it starts."

I. L. Bite: "What is it?"

S. A.: "Nothing to nothing—before it starts."
