AN AUTOMATIC PRESSURE COOKER which operates on electric current and turns itself off when the food is done is on its way to you. It should be in stores sometime next year.

MEMO TO VETERANS. At least a million suits made from surplus war fabric to retail at around \$30 are coming on the market. Stores will hold them especially for ex-servicemen.

BREAST OF YOUNG CHICKEN has been discovered to be an excellent source of the important anti-pellagra B. vitamin, comparing favorably with pork and beef livers in this respect.

FURNITURE MANUFACTURERS see no way to catch up with abnormally high replacement demands, plus the needs of new families, for at least a year yet. Only one out of ten persons wanting bedroom and dining-room sets will be able to get them during the next several months, they estimate. Good lumber and wire for springs are the greatest scarcities.

WALLPAPER is not yet abundant, due to the continuing high demand for all paper products, but manufacturers are adding new patterns which they couldn't do during the war and the over-all supply is steadily improving.

DON'T EXPECT MUCH SHEER LINEN on the market next summer. Ireland and Belgium are having their production problems, too.

PERMANENT WAC? The next congress will consider legislation to make the WAC a permanent part of the army. Meantime, no new recruits are being accepted, but discharged WACs can enter the service.

BY NEXT SUMMER you can get frozen tropical fruits from Porto Rico, where a big quick-freezing plant now is under construction.

MORE BEET SUGAR is coming out of the West this fall—about 20 per cent more than last year. That will mean more sugar, but not 20 per cent more; beet sugar accounts for only about 20 per cent of our total supply.

YOUR SALT CELLARS won't clog if you use a new moisture absorbent which will take in water up to 40 per cent of its own weight. It can be used again after a few minutes in the oven.

EYEGASSES WITH NO GLARE may soon be available. A process has been developed for coating the lenses with a transparent durable film which reduces light reflection to next to nothing.

THERE'S A NEW LIQUID which works like magic on wobbly chairs and loose tool handles. It expands the wood fibers in the rung or handle so it swells tight in its socket. Other uses: shrinking old screw and nail holes so they can be used again; silencing squeaky stairs.

VENETIAN WINDOW. A new glass has slats which open horizontally like a venetian blind. Up to 90 per cent of the window area can be opened. When closed, the slats overlap to create a watertight seal. It can be made up for doors, ceilings and interior walls.

FOR DELICATE LINGERIE and other materials there is a new hand washer shaped like a plunger. Made of molded rubber, it is perforated to provide a light dousing action and said to be especially suitable for washing rayons.
