

Camp Sapphire Has Successful Season

MORE THAN 20,000 VISITORS AT CAMP DURING SUMMER

Recreation Center Proves Highly Popular With Employees And Families

Camp Sapphire, our new employee recreation play ground, has just completed a very successful season. Many improvements were made prior to the opening of the camp season last June and facilities were established for many types of recreational activities.

It has been estimated that more than 20,000 Ecustans, their families and friends visited the camp during the summer. The picnic facilities were greatly expanded providing many areas for family groups to prepare and serve their picnic lunches. Also, the swimming area was thoroughly reconditioned and cleaned and a coat of sand was placed on the bottom of the lake before it was opened for swimming.

Many activities were carried on during the summer including scheduled softball games; exhibition in swimming and life saving by the American Red Cross Aquatic school; a six-week boys' coaching school in sports; the canteen was open with soft drinks, sandwiches, candy and ice cream available; swimming instruction was given; and play ground facilities provided for children with a full time supervisor in charge.

Beginning as of June 2, every Sunday during the summer was designated as "Family Day" and on these days special entertainment was provided including tennis matches, ball games, swimming and diving exhibitions, movies, music, etc.

Adequate equipment for all kinds of sports was available at all times.

Ecusta's big annual Fourth of July Picnic was again held here with between 5,000 or 6,000 people attending. Also, several departmental barbecues and picnic suppers were served there.

Last year the lake was stocked with small fish and since their growth was much greater than had been hoped for, it was decided to open the lake to all employees for fishing on August 1st on a limited basis.

DO YOU KNOW?

Almost one million work years were lost in American industry last year through illness. In a study of 1,000 cases, it was found that 66 per cent had dental infection.

More than a billion coffee trees are needed to produce enough hot java for the coffee drinkers in the United States. A coffee tree produces only about two pounds of green coffee a season, and the average annual per capita consumption in this country alone is about eighteen pounds.

When you speak of having a barbecue, you are using an American version of the words, "barbe a queue." This is a French phrase meaning literally "from beard to tail." The phrase came from the

Transylvania Boy Scouts Hold Jamboree At Camp Sapphire

Shown in the three photos here are the Transylvania Boy Scouts holding their annual jamboree at Camp Sapphire, Ecusta's recreation playground. Members of the executive committee are pictured sitting at a dinner table in the top photo; Scouts pitching pup tents are shown at the right; and, with smoke in their eyes, the boys are roasting "hot dogs" in the picture below.

old French custom of roasting on a spit the entire carcass of a goat. It was roasted from barbe a queue, or from "beard to tail."

The largest masonry structure ever erected by man is the Grand Coulee Dam on the Columbia river. The dam is seven times as big as the Cheops Pyramid in Egypt. Its spillway can form a waterfall five times the average flow of Niagara and three times as high.

There are several good five-cent cigars on the market, but they are sold at higher prices.

WIFELY REBUKE

The aggressive wife of a meek little man was taking her husband apart one day. While she was raving at him, the doorbell rang and some friends came to visit them.

The little husband sat in dejected silence and listened to his wife and friends talk.

Suddenly, during a lull in the conversation, his wife glared across at him and shouted, "And don't sit there making fists at me in your pockets, either!"

Don't wait until its's too late to practice safety.

CAN MAIL MANY

(Continued From Page One)
letterhead paper adapted to three important functions—lightness for economical air mailing, distinctive enough to satisfy the demands of discriminating buyers and modern enough to meet the needs of all-purpose letterhead papers which will arise out of the new air mail rate change.

Electricity packs a terrific wallop.
