

### Happy Day For Marder Family

Mr. and Mrs. Frank Marder experienced a happy day June 9 as did their son, Gerard, who graduated from the University of North Carolina on that day. Gerard, who worked in the Laboratory prior to entering the service, served in the Philippines and China while in the Navy. He held the rank of Lt. (jg) when he was discharged in September of 1946. He plans to study medicine and is in summer school at the present time.

### MARTHA SELLERS: MISS HOBBY, INC.

Butterflies, Carvings, Rocks, Drawings Interest This Versatile Hobbyist

One of the most versatile hobbyists here is Martha Sellers, of Research.

Even though her butterfly collection is her pet, she has a varied assortment of minerals, arrowheads and wood carvings. Add to these, her musical and art talents, and you have an individual of all-round ability.

She has more than 70 species of butterflies and moths, carefully and beautifully arranged in glass frames. Although she has been collecting them for only four years, Martha says she has been greatly interested in nature all of her life. She has species from India, Africa, Madagascar and other foreign countries. Most of her collection is local.

"I guess I think more of the one from Madagascar than any of the others," Martha replied when asked if she had any favorites in the collection.

Her wood carvings are very petite. The harp and piano are carved from cherry wood while the violin is shaped from soapstone. "I don't suppose a lady should carry a pocket knife," Martha says, "but that's what I do my carving with."

Martha likes to draw, has some well-done works on the wall of her room. She also sings and plays the violin.

After reading of these varied talents, our opening sentence about Martha's versatility is hardly necessary, do you think??

#### CONFUSING QUESTION

Father: "You can ask a question, but make it short."

Small Son: "Well, when a doctor gets sick and another doctor doctors him, does the doctor doing the doctoring have to doctor the doctor the way the doctor being doctored wants to be doctored, or does the doctor doing the doctoring of the doctor doctor as he wants to doctor?"

## Maintenance Departmental News

By EMMETT CLARK

With good old warm weather here to stay (at least for a few months) everyone is catching spring fever. Some are taking vacations and just resting and some are taking fishing trips, etc. Speaking of fishing, we see by the papers that Ed Happ and family spent some time on the Florida coast fishing—and with some real luck. We hear he and his son stand a good chance in the fishing contests.

Hershel Edmundson and Bruce Reynolds have been getting up at 4 o'clock in the mornings and going to Cascade Lake fishing. As yet we haven't seen any proof and we will also give them credit for not telling about how big the ones were that got away.

Dock Smallwood almost got pushed into a pipe fitter's job the other day. He saw what was up, he slowly came back down to the floor.

Harold Torrence says next time Jesse James and Lace Lance come out and make fun of his little mule he is going to slap a yoke right around their necks and plow his whole crop.

It has been alleged that Cabe and Bruce Reynolds got their picture taken somewhere on the mill grounds. Wonder who will be able to fix the camera (for we know it's broken).

Bub Thompson and Shorty Whitaker went for a cruise and big sea fishing the second of this month on Camp Sapphire Sound. After they had gone out several miles (feet), Bub saw a couple of Whales (3" fish), he got sea sick and Shorty had to bring him ashore and take him home.

We understand that Jack Wilson is growing himself a push broom mustache while he is on vacation. Now we hope he doesn't get chicken hearted and mow it off because we would all like to see it.

James Passmore went on a little trip to South Carolina some time back and on his round got mired up to the axles in the red clay mud. A man came by riding a donkey and James asked him if he knew anyone who could pull him out. The little man took James' tire chains' hooks from the car and tied a knot in the donkey's tail; hooked the chains over the knot, and out came the car!

All the men in Maintenance took advantage of the Chest X-ray examinations that were given here at the plant during the week of May 26.

Ben Rickman did a nice job landing the plane which he was flying after it ran out of gas near Horse Shoe. He made a perfect landing in a corn field with no damage to the plane or himself.

Will Westall sits on his front porch with a shot gun for fear some certain fellows will dust his bee hives with bean powder.

### Newbury And Mann Attend Safety Meet

Hank Newbury and Jerry Mann of the Safety Department attended the quarterly meeting of the Western North Carolina Safety organization held last Friday night, June 20, at Champion Fibre and Paper Company. Short talks by several Champion foremen featured the meeting. The session was held here at Ecusta last quarter.
