**Question: "What would you do if someone left you a million dollars?"**

**JULIA MORGAN, Fundamental Research:** "After I got over the shock, I'd spend the first few years in a rest home. Then I'd buy a farm with a lake on it, plenty of colliers and horses; a dark room; a motor boat; and a green Buick. Then I'd go to medical school. Oh, yes, I'd see every football game the University of North Carolina plays as long as I live."

**NOAH GOODE, Landscape:** "I'd like to invest my money in a baseball club and with all this money I'd buy good players, so I'd have a winning team. I'd also buy myself a farm and would relax there between seasons."

**WILLIAM F. BENTON, Finishing department:** "At my age, I would want to do something that would help people who are needy. During my lifetime I've seen people who lost their homes and I wished that I could replace those homes. If I suddenly received a million dollars, I'd want to help people like that and would put my money to use helping the poorer class of folks who are in need."

**MARY W. KILPATRICK, Finishing department:** "I'd make arrangements to further my daughter's education. Then I'd like to travel some. I've always been fond of old people and children and would build a home for underprivileged children and old people here in Brevard. I'd spend all my time and money helping these needy folks the rest of my days."

**GEORGE BULLOCK, Engineering Office:** "A million dollars? First, I'd probably drop dead, but if I didn't, I'd buy myself a place in Texas. I've traveled around quite a bit and Texas appeals to me plenty. I like it better there than any place I've ever been. I'd like to live there and having a million dollars would solve the problem. I'd spend the rest of my days there relaxing and taking life easy."
