Confusin' But Not Amusin' . . .

is the wide variation in women's clothing styles today. It is fashionable to have that "well-covered" look as well as to look quite bare, as illustrated below. During the summer, styles varied from full skirts to narrow and straight ones, long suit jackets to short and bolero-style ones, low necked blouses to high ones, checked ging-

hams to bemberts, etc., and yet all were considered definitely "in" so far as style was concerned. One thing is certain, though—dress and skirt lengths will be longer (from mid-calf to ankle), and the fashionable gal will be draped, bustled, and corseted to the last notch in the Fall of '47. It is quite obvious that bank balances will hit an all-time low after today's women fill their winter wardrobes.
