

It Was A Day Of Activity....

Pictures at the right show some of the activities NEA members enjoyed while here. In the photo at the top, Dr. Earl Bryant of the Pilot Plant is explaining a Pulp Mill process to his interested listeners. The visitors were divided in groups of eight or ten and shown through the plant by guides from Ecusta.

The middle photo shows part of the large crowd in the cafeteria for the luncheon and program which was broadcast over Station WBBO, Forest City. Entertainment by the Ecusta Recreation Department featured the after-luncheon program.

Mr. Ed M. Anderson, publisher of the local Transylvania Times and four other western North Carolina weeklies, is helping some of the NEA members with their return trip home. Mr. Anderson, A NEA director, was in a large measure responsible for the association's visit here. He presided at the luncheon.
