

# You and Yours

## ALCOHOL AND AUTOMOBILES

Whether you're *driving while drinking* or *drinking while driving*, you're really behind the proverbial "8" ball in case of an accident.

There is no doubt but that one's clear thinking and quick reactions are dulled to a certain extent by any form of *alcohol*, whether it be *just a bottle of beer* or a *short nip of whiskey*. The main thought is . . . 'tis a *dangerous practice*.

Many happy homes have been broken up and numerous innocent lives have been snuffed out, by *some thoughtless person trying to mix alcohol and the operation of a motor vehicle*. These two items just won't blend together where anyone's safety is concerned, and aren't we all obligated to practice self-preservation for our own sake?

It is rather alarming to note the large number of cancellations of drivers license in our State each month, *due to persons driving while drunk*. And yet, such instances do continue to take place each week, with mangled and torn bodies resulting from the unnecessary wrecks on our state highways.

When each individual accepts his or her responsibility in eliminating this very hazardous practice of *driving while drinking*, then our deaths on the highway will decrease and not before.

Remember: IF YOU DRIVE—DON'T DRINK AND IF YOU DRINK, DON'T DRIVE.

## And Always Will Be!

*SAFETY* has been and always will be, yours for the asking. In fact, those interested in the prevention of personal injuries will even argue that you accept safe practices as a part of your job.

Accidents don't just happen—they are caused. But they do not happen to and are not caused by those employees who are safety conscious.

Since safety is free and your very existence depends on it, you should accept it as a good bargain and beg for more.

'Tis Your Life . . . You Keep It Safe!
