

Safety for 7

A WORTHWHILE PLEA

Far too few of us stop to realize that prayers are being uttered daily in our behalf, and there are some of us who are not doing our utmost to see that every possible assistance is rendered toward such prayers being fulfilled.

There are few homes which have not experienced the tragedy which accompanies serious personal injury

or sickness of the loved ones, and in many cases, such tragedy could have been avoided through CARE.

Our own personal welfare and safety is something that each of us should be vitally interested in, and something that we alone can contribute to, more than anyone else on earth.

Honestly, folks, the least we can do is to live, play and work the safe way.

Broadcast what you know about safety. It's not only the knowledge of safety but the practice that counts.

WHAT WOULD YOU DO?

If you were connected with the Safety and Medical Department, and vitally interested in the elimination of the *useless suffering, discomfort, and loss of wages* that accompanies personal injuries, *what would you do?*

Even though this is not a *Quiz Program* and there are no cash awards offered for the correct answer, this could easily be classified as the \$64.00 question. In fact, your answer may be worth much more than that, in having the satisfaction of knowing that you have assisted in the elimination of unnecessary personal injuries to yourself and your fellow-workers.

The Safety Department *has been and always will be*, interested in receiving suggestions for preventing personal injuries. You employees know the hazards that exist in connection with your respective jobs, and it is your responsibility to notify us if we can be of help in any way. The Safety Department is set up to act in an advisory capacity in our accident prevention program, and the carrying out of safe practice rules and regulations is really up to you and your supervisors. It is an established fact that an accident prevention program, regardless of what person is at it's helm, can never be successful without the full cooperation of every individual on the payroll.

Honestly, what would you do?
