MAINTENANCE DEPARTMENT

The Maintenance Department is charged with keeping all of the machinery and auxiliary equipment in perfect running order. Besides the normal duties of maintaining our equipment, designing new equipment, and making new installations, this department eternally plans ahead, maintaining a constant program of preventive maintenance. A complete history is kept of every piece of machinery.

The Machine Shop makes all necessary repairs on equipment and make many new parts for the

machines. The Carpenter Shop makes boxes for various shipments as required and maintains all wooden structure. The Electric Shop is continually busy checking some 4000 motors, making coils and rewinding motors, maintaining a running history and making repairs on every piece of electrical equipment, replacing lights, and designing and making all new installations.

The Maintenance Department is also responsible for the maintenance of the grounds, the painting of all buildings and equipment, and repairing and making brick and concrete construction.
