610

*The non-slip quality of "Neo-Cord" soles and heels is corded for safety, and is never outworn. The grip of the sturdy cotton goes all through the sole from top to bottom. It stays slip-proof for the life of the shoe; as long as there is any sole left.*

SAFETY SHOES THAT ARE UNEQUALLED FOR PROTECTION AND COMFORT, WILL BE OFFERED TO OUR MALE EMPLOYEES AT ABSOLUTE COST.

A recent decision by the Company to allow the Safety Department to stock these shoes, will mean much to our personnel from the standpoint of SAFETY, as well as making it possible for them to purchase well built footwear in an OXFORD or SHOE, at a much lower price than they can be purchased elsewhere.

These safety shoes will be handled in the office of the Safety Department, and will be sold on a cash or payroll deduction basis. For those who desire the cost of shoes to be deducted from their earnings, arrangements have been made for this deduction to be made over a period of two weeks.

Based on the order that was placed the first week in August, and which is expected to arrive by September 1st, the prices of these four styles of shoes, including the freight and state tax, will range from approximately \$6.30 to \$7.25 per pair. It must be remembered that the price of safety shoes, like all other commodities is subject to change, but they will always be sold to our personnel at absolute cost. There will be no charge for handling, fitting or payroll deduction work involved.

No. 610 is a moccasin oxford in soft burgundy elk, having a "Neo-Cord" sole and heel processed from duPont oil resistant Neoprene. Especially suited for workers whose feet are in contact with oil. This oxford is ful-
