Fibre Warehouse	2	49,920	40.06	2-16-50	318

TOTALS 7 2,637,357 2.66

With the entire Mill having experienced the lowest accident frequency rate during 1950 since operations began in 1939, the Safety Department felt that everyone would be interested in the above information. This record is the result of the interest and cooperation that was manifested by every individual on the payroll of Ecusta and Endless Belt, and represents a great decrease in suffering and loss of wages to our personnel as a whole.

It is very gratifying to know that the entire Mill experienced its best safety record at 8:00 a. m. on March 20, 1951, when it had operated 117 safe days with a total of 1,001,245 manhours.
