

Shown above is the newest Transylvania school building, located in North Brevard. This school was named in honor of the late Harry H. Straus. It is the first school to be completed under the state appropriation fund, and at present has 929 students in 8 classrooms.

The schools in the county, and the number of student and number of rooms in each for the 1951-52 season are as follows:

SCHOOL	Students	Rooms
Brevard High	456	16

Brevard Elementary	983	28
Penrose	272	8
Pisgah Forest	260	9
Selica	44	2
Harry H. Straus	299	8
Rosman High	151	10
Balsam Grove	62	2
Lake Toxaway	80	3
Quebec	69	2
Silversteen	49	2
Rosenwald	166	5
TOTAL	3441	110

SIX RULES FOR BETTER LIVING

DON'T WORRY—Keep your insurance paid up and see that your brakes are O. K. It's always well to provide for every emergency but once you have done this drop your cares and you will have nothing to worry about.

DON'T QUARREL—with your boss, your customers, or your family. It is not good for your blood pressure and who knows perhaps their viewpoint may be as good as your own.

DON'T HURRY—remember there are 24 hours in every day, that most days have plenty of sunshine and there's plenty of time to work, for golf, and plenty of time to think great thoughts.

DON'T RESENT—maybe Mr. X has done you a wrong, but the law of compensation will adjust it. Put him out of your life entirely and you'll be happier.

DON'T GRAB—honest endeavor is the only road to happy possession. If you don't like your present surroundings prepare yourself for something better and grow toward your ideal.

DON'T POST-MORTEM—about lost orders, ball games, and social delights. Nobody is interested in what didn't happen. Talk realities and you'll be popular.

WHAT DO YOU KNOW ABOUT FLOWERS?

Do you know that there is a Shrimp Plant, so called because its blooms are the color and shape of shrimps?

Do you know that there's a new ivy with curly leaves with the appropriate name of "Curlilocks?"

Do you know that the perfumes and fragrances that women enjoy most come from flowers—Roses, Lilacs, Carnations, Lilies-of-the-Valley, Violets, Jasmine, and others?

Do you know that it takes from five to seven years to bring Orchid plants, planted as seed, into bloom?

Do you know that members of the Calla family were among the earliest known plants in the world? White Calla Lilies grow like weeds along irrigation ditches in Egypt and California. Jack-in-the-Pulpit, which is a member of this family, has a tuber that Indians roasted and used for food, thus giving it the name of Indian Turnip. Uncooked, it contains chemical crystals which prick the tongue.

Do you know that Caesar became bald when he was about 30 years old and afterwards wore a crown of flowers or leaves to conceal this defect? This might be an idea for the twentieth century man who suffers from baldness.
