

Recently Retired

George S. Millington

Thomas J. Graham

George S. Millington, Manager of the New York office of the Ecusta Paper Division, and Thomas J. Graham, Stock Records Clerk at Pisgah Forest, retired on January 1.

Mr. Millington, a native of New Jersey, became associated with the late Harry H. Straus in 1925. In 1927 he was employed with the Cork Import Corporation in New York. The corporation was sold in 1929, but he remained with this organization until 1935. He was employed by the Champagne Paper Corporation from 1935 until that

organization became a division of Ecusta in 1948.

Mr. Millington will retire to his home at 125 Liberty Street, Ridgewood, New Jersey. He plans to spend all of his time with his many hobbies and various civic programs.

A native "Tarheel", Mr. Graham was born at Rowland, Robeson County, North Carolina. He was employed February 14, 1945, being in the Main Office from that time until he was transferred to General Stores in August, 1952. Mr. Graham has moved from Asheville to Goldsboro.

WHAT'S NEW?

New Lock For Rear Car Doors replaces the conventional lock button, giving you either safety locking or normal locking. Pushing a button locks it down so that it can't be pulled up, preventing accidental opening of the doors by children. Unlocking it with the ignition key returns it to normal use.

Car Safety Belt for the front seat grips an occupant by the shoulders as well as the waist in a collision or sudden stop. It is anchored by a U bolt set in the floor of the car 8 to 12 inches behind the front seat; and it will not interfere with the folding action of the front seats in 2 door cars.

Novelty Light with all the makings of a good traffic stopper is the Mem-O-Lite. A plastic base mounts the little lamp and holds a memo pad and pencil. Lifting the pencil turns the light on, replacing it in its groove turns it off.

Motorist's Aid is for motorists who have a fear of changing a tire in the night on a poorly lit or dark road. The new highway safety light kit features a spare sealed beam automobile headlamp that can be snapped into a steel stand. The unit's beam can be thrown where the driver requires the light—on the blownout tire or at the motor.

Thermo-Base Warm Air Baseboards . . . A simplified system of base-board warm air heating is called Thermo-Base. The units look like baseboards, but have a row of holes through which warm air is evenly distributed. They are to be installed in perimeter walls of each room, usually under windows.

Odor-Free Enamel . . . A new line of interior finishes to be known as Odor-Free employs improved alkyds developed in Modene's laboratories. In addition to being entirely free of the usual pungent paint fumes, the new line offers a variety of properties not heretofore combined in any single line of either odorless or regular interior paints.

New Timberline Siding has the appealing rustic finish of the prestained, deep-shadow Western Red Cedar. The combination of soft-finish, natural-wood beauty, and practical, long-lasting factory staining seems to make Timberline a natural choice for ranch-type houses and other popular new home plans.

Nonelectric Door Chime . . . An unusual new item just introduced is a 2 note nonelectric door chime with a solid brass nameplate. The nameplate mounts on the outside of the door and has a brass turn knob which operates the chime.
