

"C" SHIFT COATING

Troy Bryan, believe it or not, has finally done something to get his name in this news. Troy is now on vacation in Florida and we won't be able to tell you folks very much about it this month, but we will double up on his next month.

Flash! L. V. Neill was seen in H-ville slipping from alley to alley and back street to back street with a package under his arm that looked kind of shady. But when it was all out in the open, behold it was a set of new seat covers for his Plymouth Rock. They really look nice too, L. V.

Has anyone got any old fences they want painted? If so we have a modern Tom Sawyer in our gang. Jim Dalton is his name and he did such a nice job on his fence you can see it shine from the High School below his house.

We have a few additions to our Towers. They are: Ken Hall, David Shepard and Max Ramey. Welcome to the Towers, boys. We're glad to have you—and may your stay here be a pleasant one.

Word is going around in the Towers that one of the No. 1 operators got so wild with his patches that now he is known as "Wild Bill". So when you want to know who "Wild Bill" is, ask Preston McCrary. He could probably tell you something about it.

By the time this has gone to press our Supervisor, Bud Pettit, will be lazing it away up in Clinton, his home town. So here's hoping you have the best of luck on your vacation, Bud, and think of us down here slaving it away on Graveyard.

That's about all the news I know so I'll turn it over to your other news reporter now and remember always, SAFETY FIRST!

Jim Silvers is fixing up his A Model. He has painted it and is putting chrome head bolts in the motor. He said that when he was finished it would look like it had come from Kress' 5 and 10-cent store.

Lee McCrary almost has his house finished. He said that he was aiming on moving in when he came off Grave Yard but he couldn't get his windows. He said he was going to build a chicken house. Someone asked him what for, and he said he was going to raise some pigs in it.

Jim Dalton is taking his vacation in about two weeks and he said he was going to Florida. Here's hoping you have a nice trip, Jim. Just don't get sunburned too badly.

Antistatic Polish . . . Just hitting the commercial market after a couple of years testing is Lustrol polish. Containing 6% silicones, the emulsion product is claimed to be useful for cleaning and polishing glass, furniture, and automobiles. No abrasives are included in the formulation—which is plugged for its non lint-collecting, antistatic electricity qualities.

Welcome to C. Shift, Ollie Bryson, Jr. We are glad to have you. You make this shift 100% G. I.

Well Leo Burden did it at last. His little girl arrived while we were on Graveyard. From all reports she is doing fine. We will let you know later how Leo is doing.

Hovey Waldrop's third girl arrived recently also. Only three more girls, Hovey, and then a trip to Bermuda after retirement.

Joe Black gets this year's prize for the fishiest fish tale. He says that last year he accidentally dropped a bottle of hair tonic in Lake Postoll. Soon all the fish began to grow long beards. The local fishermen simply sat in their shacks, painted Red & White barber poles at the edge of the water and hollered "next".

We wonder what those knots are on Hubert Batson's head, and did he have a birthday recently?

Homer Merrell would like to buy a hub cap for his car. It seems that someone borrowed one of his. So he took the other three off just to make all his wheels look alike.

Paul Patterson is another newcomer to "C" Shift. His hobby seems to be recruiting men for the Army. We think he doesn't want to suffer alone those two hot weeks in Camp this summer.

Vicrtex is a vinly-fused textured material that can be used for upholstering or wall covering. It needs no backing or lining, is soft and pliable for easy contour shaping. It won't scuff, fray, peel or crack; has a flame-resistant outer layer; wipes clean with damp cloth; is practically indestructible.

Mirror specs . . . If you're a bug for reading in bed, here's a marvelous new pair of glasses for you. They're designed to let you see the book with your head flat on the pillow. They are wonderful for TV watchers, also. Optically correct, they fit anyone and can be worn over regular glasses.

Bronze weather stripping can be applied with an adhesive instead of nails or screws. Down the center of the stripping runs a slight bulge of thin metal which makes tight seal when the door or window is closed.
