GENERAL MAINTENANCE SETS NEW SAFETY RECORD

The General Maintenance Department of Ecusta Paper Division set a new safety record for the department at midnight on August 18, with 1000 days without a lost time accident. This represents one million man-hours, and almost doubled the previous record set between September 9, 1944 and June 14, 1946.

The entire department celebrated the occasion with a chicken dinner in the Transportation building on August 19.

This was by no means a record for the plant since there are other departments with longer safety records. But, for a department that has so many men, continuously working on non-repetitive jobs, with all types of tools and machines, it is certainly an enviable accomplishment and one of which the maintenance members can be proud.

The members have set a new goal at 1000 more days, or 2000 days in all, without a lost time accident.

Above: The chow line outside the Transportation building on August 19 when the men of the General Maintenance Department of Ecusta Paper Division celebrated the establishing of a new safety record with a chicken dinner. The new record of 1000 days without a lost time accident was set at midnight, August 18. Every member of the department and several guests attended the dinner. Left: Prior to the meal, Mr. Dixon spoke briefly to the men, commending them for their outstanding accomplishment.
