

CONGRATULATIONS TO EVERYONE!

YOUR GOOD SAFETY ATTITUDE HAS PAID OFF AGAIN

On March 8, 1954 we received a bulletin from the Statistical Division of the National Safety Council, advising that the PAPER DIVISION had finished in FIRST PLACE in the Pulp and Paper Section SAFETY CONTEST for 1953. (The PAPER DIVISION was a member of Group "A", which consisted of 52 mills averaging 170,000 or more man-hours per month).

This is the second year in a row that you have achieved this outstanding accomplishment, and remember, you were competing with 51 mills throughout the United States and Canada, who have one thousand or more

employees.

The forthcoming Safety Award is one that each of you should be proud of. It will not only designate your being "TOPS" among the largest pulp and paper industries, but the obtaining of it has assured you of less suffering and loss of wages.

This achievement has not been reached "by accident", but through your wonderful safety attitude and wholehearted cooperation in our all-out accident prevention program.

Be proud that you have had a part in helping prove that ACCIDENTS CAN BE PREVENTED.
