American Hero

Begun in America (at least on the public stage) with the Salem Witch Trials in the late 17th century, unexplained 'natural' phenomena have been attributed to supernatural forces at work. Continuing in this tradition is Pat Robertson who finally figured out why the Earth quaked in Haiti. Some of you may be reading this wondering, "Hey, don't moving tectonic plates cause Earthquakes?" Well, you'd be wrong. Pat Robertson, through extensive research, has deduced that the Haitians made a pact with the devil to expel the French from their Island in the late 1700's. Said Robertson, "Something happened a long time ago in Haiti, and people might not want to talk about. [Haitians] were under the heel of the French...and they got together and swore a pact to the Devil. They said, 'we will serve you if you'll get us free from the French.' True story. And the Devil said, 'OK it's a deal.' Ever since, they have been cursed by one thing after another." Thank you Pat Robertson for finally clearing up that God hasn't gone quietly into that night and still has a little bit of his Old Testament style wrath left. For reminding people that 'natural' disasters are just proof that supernatural forces are still toying with our day to day lives, The Clarion salutes Pat Robertson, this week's American Hero.
