

Odds and Ends

Chef Boy-ar-Dave: Food Mountain Pizza

Average Cost of Meal: \$20 total

Time of Preparation: 30

Cook Time: 45 Minutes-1 Hour

Serving Size: 4 or 5 people. Makes about 10 slices.

Ingredients:

- 1 Large Aluminum Baking Sheet
- 1 Cup of Flour
- 1 Ball of Dough (Jet's Pizza Dough is only \$1.50)
- 1 Can of Pasta Sauce
- 1 Bag of Shredded Mozzarella
- 1 Medium Onion- Sweet, White, or Red
- 1 Red Pepper
- 1 Green Pepper
- 1 Yellow Pepper
- 1 Package of Pepperonis
- 1 lb of Boneless, Skinless Chicken Tenders
- 1 lb of Sausage
- 1 Can of Green Chiles

Instructions:

Preheat oven to 375°. In two separate pans begin to Brown the pound of Sausage and Cook the Chicken Tenders. Sprinkle flour on the Baking Sheet to prevent the pizza from sticking to the sheet. Begin to knead and roll out your pizza dough as large and thick as you want. A Ball of Dough from Jet's is the same as a Large Pizza. Cut up all your vegetables into either thin slices or chopped very small. Once your meats for the pizza are cooked lay out your dough on the baking sheet and cover the dough in a light covering of Pasta Sauce. Sprinkle Cheese over the sauce and begin to add all your toppings. Bake in the oven for 45 Minutes-1 Hour on 375°.

This meal is called "Food Mountain" because the pizza should be about 3" or 4" tall and weigh somewhere in the neighborhood of 4 pounds.

Sesquipedalian Literary Society's Five Dollar Word of the Week

Stochasticity [stuh-KAS-tis-i-tee] noun

Definition

the quality of lacking any predictable order or plan; randomness

Etymology

Greek stochastikos, from stochastēs ("diviner"), from stochazesthai ("to guess at"), from stokhos ("aim, goal")

Usage

Mr. Simmons usually followed the lesson plan, but when one of his fourth grade students expressed special interest in an unrelated topic, he couldn't resist veering off the allotted schedule to explore this exciting new topic. Surely a little stochasticity wouldn't hurt anybody!
