## Gardner-Webb offers links to internships and jobs

# Career Fair offers students opportunities

Laura Dean  
Pilot Staff

Are you looking for job opportunities? Are you not sure what you want to do with your life? Did your teacher say something about extra credit?

If you answered "Yes" to any of these questions, the Career Fair is what you're looking for.

November 9 through 13 has been designated as Career Week. Events to be held include resume workshops, interview workshops and how to do a

30-second commercial.

The Career Fair will be held Wednesday, November 11 in the OMG

Hall from 1 to 4 p.m. Students are reminded that recruiters will be there, so they need to be "dressed to impress" and have their resumes with them.

"This will probably be the biggest Career Fair we've ever had. The reason for that is we've done a really strong initiative in marketing to

different companies in the region," Holly Sweat, Director of Career Services, said.

**"This will probably be the biggest Career Fair we've ever had."**

Companies that will be represented at the fair include: First Union, BB&T, Family Dollar Corporate Distribution,

Harris Teeter, Miliken, Kemet, PPG, Curtis Wright and The Shelby Star.

The fair has been held for about six

years. What makes this year's fair different from previous ones is that students, as well as parents, will be "bombed" with information.

"The key thing is employers are wanting work experience. If sophomores and juniors are able to utilize the Career Fair, they will be able to get their foot in the door in a company," Sweat said.

Despite the fact that the fair is aimed toward juniors and seniors, freshman Heather Stewart plans to attend. "It's never too early to start looking for internships," Stewart said.

# Jerusalem Temple replica being built in GWU library

Brian Carlton  
Pilot Staff

"I was glad when they said unto me, let us go into the house of the Lord," says the psalmist David. His sentiments were echoed by many of his own countrymen in Israel.

In that culture, the temple was a vital part of life, serving as both the religious and social center of life. Now we have a copy of that historical monument here at Gardner-Webb.

One of only two in the world, this 240-sq. foot replica of Jerusalem's Herodian Temple is being built in a room upstairs in the Dover Library.

Winston-Salem native Bill McGehee is the man responsible for creating the model, and he's donating it to the school to be used as a teaching tool.

A retired business executive, McGehee spent five years and \$54,000 of his own money to design and build the temple and hours of research studying historical and archeological accounts of the structure.

McGehee is taking the time to work on this temple because he believes it will

enhance learning. He wanted I'm glad the model has found a Currently, McGehee is

to design a 3-D picture of the site where many of the Biblical stories took place. McGehee believes that it's easier to discuss Biblical issues when you can see the actual setting.

"I believe Jesus works through people and events, and

home at Gardner-Webb," said McGehee.

"Knowing the school's commitment to religious studies, I can say that the most rewarding part of the construction process has been bringing the model here," he added.

putting the finishing touches on the temple model in his converted studio in the library. He hopes to have it finished within the next weeks.

According to some students, it's an awesome display, and McGehee welcomes stu-

## GWU gets computer gift from Glaxo-Wellcome

Mary Jones  
Pilot Staff

When a group of students from Gardner-Webb's science department went this month to the Glaxo-Wellcome meeting, they returned with 12 Macintosh laptop computers complete with disk drives and printers.

Glaxo-Wellcome, a major pharmaceutical company, provides its employees with new computers regularly and tries to find places to donate the used ones. At the meeting, the company gave away 288 computers to the 24 schools that attended. The Macintosh Powerbooks are 94-95 models and have basic software and color screens.

Glaxo-Wellcome offers scholarships to encourage women in science. This year's recipients, of the Glaxo-Wellcome Women in Science Scholars Program, are Christina Cox and Katie Jordan. They were selected
